Anyone that is willing to invest in me, I can show proof in my earnings. What it's about it's none of your business. That are my own method but you will 100% have your investment back, if you want, check with small investment :)

Stevensan - October 10, 2016, 7:31 am

You can't 100% guarantee that you will win. If people understand how to manage their bankroll then they will make a profit on the long term.

Logic says that if you have money in your pocket you don't ask for investment

If you want to invest \$1000 then you are not going to invest your whole \$1000 at once. You only invest 5% of that for each bet. That is \$50.

Well time varies differently. Depends the investment. The lower the investment, the faster we will proceed. For example if you invest \$100, it will take more since I will withdraw the money most likely and buy some weed, sell it and give you your %. So I would say from 1-7 days :)

you aren't the one with the risk. I am, since if I fail I will have to pay you from my own pocket. What I am doing is basically working with your money. You get your amount either if I fail or if I success, that's why I wouldn't work right now with more than \$100 for this service :)

If someone wins, then you have taken 80% of his profit. For example someone has invested \$100. Then he wins. Now he has \$200. If he invest in you then he has \$120. He has only \$20 profit. The only advantage is that you offer his investment back if he loses \$100.

I think he wants to make more money. For example he has only \$200 to invest. Then he borrows \$100 from you. He can now invest \$300 total. If you win then he takes 80% of your profit. That is \$80. either what the guy above said, or simply he wants to help others get more money as well. I know he does bet regularly, I was in his group in the past and was winning a fair few, nothing low either. But if he had \$200, then he would have enough to bet for his own and sole benefit. There'd be no reason for him to risk a loss of the invested amount for a ROI of 80% when he could risk a loss of his invested amount for a ROI of 100%.

Deal with caution. Just a heads up. Could be real or fake. You'll never know until you invest.

He was spamming his sports betting service. Even though he pays, he should've stucked to his own thread.
