Just as a heads up to anyone who is thinking of doing this.

Modification of the Binary in this method will null your license to the software.

Ah yes.

The age old art of taking people's work and posting it around claming it your own.

That is some seriously dumb logic.

Whether KFC is provided a copy it is still a violation of TOS, and when the binary gets uploaded to Virus Total its game over. Once he sees the install dialog has been removed that license is getting banned.

I guess but that would take a lot of time and take forever for him to find? You would have to be really unlucky

ShockWave is developing a system that automatically does this. ShockWave/KFC and Nexus are teaming up to prevent abuse.

Well that's because he has a stick up his ass. He doesn't have to worry about too many future buyers so that's nice
