Thread: [Closed PM for more info](#)

kpown - September 13, 2016, 8:00 am

closed for now

PM for more info

ThisIsCyn - September 13, 2016, 8:30 am

Nice content, people are gonna try this and get faced with legal issues + a few of them won't work depending on configurations

kpown - September 13, 2016, 8:34 am

(Sep 13, 2016 08:30 AM)ThisIsCyn Wrote: [\[CITE\]](#) Nice content, people are gonna try this and get faced with legal issues + a few of them won't work depending on configurations

Yes, no doubt people will try these and get caught and fucked over... thats why i mentioned in the thread that it can and WILL happen. Also, I am aware that some of these will not work and they vary from network to network, school to school and thats why I provide multiple methods.

eRKoo - September 13, 2016, 11:39 am

Hey, thanks for this post. I recently became interested in hacking. I'd like you to ask for some of that full black ink page scripts etc.

Anxious.exe - September 13, 2016, 12:56 pm

Could you release your prank scripts of the fake google chrome page ? This should be funny to try at work.

However, nice tut.

kpown - September 13, 2016, 1:21 pm

When I get home I'll find the chrome script I wrote as well as the ones I borrowed from another HF user from a while ago

Anxious.exe - September 13, 2016, 1:25 pm

I have the ones you're talking about but they aren't working for me + I can't upload links here.

Perfects - September 13, 2016, 1:33 pm

Posting to look at this later seems interesting, thanks for post OP.

LastSession - September 13, 2016, 1:34 pm

"For education purposes" sure lol

Good that we have a thread now to which we can forward the kids who want to "hack" their school.

SIM-2696289 - September 13, 2016, 1:47 pm

Nice thread. Though, I recommend to avoid testing these hacks/tricks in your school. Its a dangerous game to play.

kpown - September 13, 2016, 1:49 pm

(Sep 13, 2016 01:34 PM)LastSession Wrote: [\[CITE\]](#) "For education purposes" sure lol

Good that we have a thread now to which we can forward the kids who want to "hack" their school. Don't hate man. I warned them not to be stupid so if they do so that is their own fault. I wanted to do the community a service due to the mass amounts of threads of people asking how to hack at school... no reason to hate on me

Anxious.exe - September 13, 2016, 2:40 pm

Can you give a link to your script / PM me ? Would be amazing.

kpown - September 13, 2016, 2:53 pm

I will edit the tutorial and add the code for my script tonight when I get home.

ThisIsCyn - September 13, 2016, 3:33 pm

I know the schools I have attended not one of these works ?? anyway good thread

Z3r0C0d3 - September 13, 2016, 3:42 pm

One of my classmates has installed keylogger , after a few days they got him , its not good idea to hack your school and its good that you warned them , but skids usually dont understand that hack your school may ruin your life instead making you looks like "cool" guy

sucet pop - September 13, 2016, 4:18 pm

Hi.

If one were to boot up TAILS at a school would the admin be able to see one's browsing history?

kpown - September 13, 2016, 4:26 pm

(Sep 13, 2016 04:18 PM)sucet pop Wrote: [\[CITE\]](#) Hi.

If one were to boot up TAILS at a school would the admin be able to see one's browsing history?

The domain admins can monitor any computer connected to the network assuming they have the proper tools. Tails however may be a different story because it routs everything thru tor. I don't have any experience a a domain admin, but I feel like they wouldn't know your history but they can see that your TAILS machine has a different internal ip than what it's supposed to have. MAC addy will be the same so they could investigate if they had excess time on their hands as many school IT workers typically do

sucet pop - September 13, 2016, 6:28 pm

Thanks. That makes quite a bit of sense.

I didn't "hate" you. I actually really like the thread. As I said, now we have a thread which we can recommend all the schoolhackers who are bad boys.

Random Arab Girl - September 14, 2016, 5:29 am

Im pretty sure the second link is broken

kpown - September 14, 2016, 6:36 am

(Sep 14, 2016 05:29 AM)Jayden.png Wrote: [\[CITE\]](#) Im pretty sure the second link is broken
Link updated. Thanks for letting me know.

kpown - September 15, 2016, 9:07 am

(Sep 13, 2016 03:33 PM)ThisIsCyn Wrote: [\[CITE\]](#) I know the schools I have attended not one of these works ?? anyway good thread

I find it very hard to believe that you tried each and every single one of these methods out and failed. If that is indeed the case, would you mind sharing what precautions the admins took when setting up the network?

For example: To prevent the gaining admin method you could simply disable USB boot and add a BIOS Password....etc

SIM-2478232 - September 15, 2016, 12:38 pm

how to hack the school grade system?

kpown - September 15, 2016, 1:05 pm

(Sep 15, 2016 12:38 PM)maximisxxx Wrote: [\[CITE\]](#) how to hack the school grade system?

Read the thread. I gave an example method. Every school has its own grading system though so there is no such thing as a universal method for hacking to change grades.

Kali_GFX - September 15, 2016, 1:31 pm

Great info thanks for this tut

SIM-2478232 - September 15, 2016, 1:32 pm

Is there a way to hack into this website as a teacher and edit grades?I would like to have the knowledge of doing so.

<http://gb.browardschools.com/Pinnacle/Gradebook/InternetViewer/GradeSummary.aspx>

kpown - September 15, 2016, 2:57 pm

<http://gb.browardschools.com/Pinnacle/Gradebook/InternetViewer/GradeSummary.aspx>

Well if your schools grading system is managed thru a website login use the method I mentioned towards the bottom of the thread (SET site cloner + DNS Spoof = credentials phishing attack). Once you've got the teachers login cress log into the site and change grades lol

NoObInT387 - September 15, 2016, 4:42 pm

Nice Tutorial, I'm sure people will find it useful

justallen - September 16, 2016, 8:45 am

where are the prank scripts?

this is very dangerous if you get caught thought hahaa

kpown - September 16, 2016, 12:08 pm

(Sep 16, 2016 08:45 AM)justallen Wrote: [\[CITE\]](#) where are the prank scripts?

I linked the prank scripts in the tutorial

Malaysia404 - September 16, 2016, 12:16 pm

I always loved messing around with computers in Highschool, Tried something similar to what you posted in this thread. Never got in trouble. I am a little more weary of trying things like this on my universities computers though....

kpown - September 16, 2016, 12:25 pm

(Sep 16, 2016 12:16 PM)Malaysia404 Wrote: [\[CITE\]](#) I always loved messing around with computers in Highschool, Tried something similar to what you posted in this thread. Never got in trouble. I am a little more weary of trying things like this on my universities computers though....
What did you try?

And freshman year at my university I ratted a bunch of pcs in one of the computer labs and got some student email accounts lol. Didn't hack them or anything cuz that's a dick move it was just sort of a security test to see if their "Industry grade AV" was any good lol. They used Symantec endpoint security. I got past it with bytecrypter...

What I did was very dangerous and not worth it if I was caught, so I do not recommend doing this

JoshuTee - September 22, 2016, 12:47 pm

Once I spread a customized h-Worm at my school. . .that was fun

kpown - September 22, 2016, 2:02 pm

(Sep 22, 2016 12:47 PM)JoshuTee Wrote: [\[CITE\]](#) Once I spread a customized h-Worm at my school. . .that was fun
Nice. What was the result and were you caught?

The One Who Knocks - September 22, 2016, 2:03 pm

Thanks for this, hacking school computers is very risking (and Illegal)
Still a nice share tho

kpown - September 22, 2016, 6:05 pm

(Sep 22, 2016 02:03 PM)The One Who Knocks Wrote: [\[CITE\]](#) Thanks for this, hacking school computers is very risking (and Illegal)

Yes it is risky but irresistible for some people that's why there are constantly posts on HF asking about it.

Dr4nk0id - September 23, 2016, 1:57 am

oooo this is helpful :)

This week shall be more fun.
now just gotta kali on my pc

kpown - September 23, 2016, 2:02 am

I'm glad you enjoyed, share this with others!

JoshuTee - September 23, 2016, 3:01 am

(Sep 22, 2016 02:02 PM)kpown Wrote: [\[CITE\]](#) Nice. What was the result and were you caught? I stripped the RAT components out and made it just spread, so there were no real consequences, apart from some major panic under the staff. They never caught me though ?

Allay0x3 - September 23, 2016, 7:01 pm

Haha, very nice tutorial indeed

kpown - September 23, 2016, 8:03 pm

(Sep 23, 2016 07:01 PM)Allay0x3 Wrote: [\[CITE\]](#) Haha, very nice tutorial indeed
Thank you and enjoy! Dont get caught :)

Transcendent - September 23, 2016, 8:06 pm

Nobody please do the remote access, it shouldn't even be on the list.

kpown - September 23, 2016, 8:38 pm

(Sep 23, 2016 08:06 PM)Transcendent Wrote: [\[CITE\]](#) Nobody please do the remote access, it shouldn't even be on the list.

It is on the list as an optional method if you're REALLY ballsy and don't give a fuck. Growing up as a kid I did it many times and I am lucky I never got caught
