Thread: [Changing .exe to .scr](#)

Dayna - September 13, 2016, 2:11 pm

Hi guys just a quick question, when changing the extension .exe to .scr does it still execute the same way?

Thank you

Faith Connors - September 13, 2016, 2:12 pm

Indeed it does, all you have to do is change the extension.

Dayna - September 14, 2016, 9:56 am

any ideas why my icon no longer shows when it is .scr

klonepal - September 14, 2016, 10:20 am

Your icon changes because its not an executable soft. Change the name extension to .exe and you will see the icon.

Dayna - September 14, 2016, 11:04 am

so it isnt possible to have .scr with an icon?

Cenu - September 14, 2016, 11:26 am

why scr?

scr is a screensaver extension..

Dayna - September 14, 2016, 11:42 am

because thats the only thing i can change my .exe to where it will still execute

Cammy - September 14, 2016, 11:43 am

(Sep 14, 2016 11:26 AM)Cenu Wrote: [\[CITE\]](#) why scr?

scr is a screensaver extension..

It'll infect people like you.

lol better use some exploits

@Cammy

pls.
