It can get annoying at times, if you are claustrophobic no shit, beards can be annoying like that.

Enjoy it while you don't have one, otherwise it will be a daily shave in the future.

When I was 18 I got a fully covered face in about 2 to 3 weeks because I used to shave with a razor instead of a machine on vacations etc, whenever I used a razor my beard would grow back really fast.

Literally everyone where I live knows this. It's funny tho, where I live we have white people, middle eastern people, black people, but the white people struggle the most to grow a beard here. But there are some of my friends and people I know who are white but have a great beard.

Growing a beard is really different for each person, you just need to find the right thing for you.

I'm gonna give you another example from me.

I was fucking 16. Never shaved, literally had so little hairs on my chin, I could count them.

One day when my dad was at work I used his shaving cream and razor to shave. And note: I never shaved before.

But after I had done that, I had to shave every month with a machine.

My great grandparents are originally from the middle eastern parts, so my beard grows really fast. It's undeniable that arabs can grow a beard easier than white people.

I also heard so many people recommending to use wax to take off hair from the chest etc so it won't grow back as fast as when you use a machine to take it off.

What you're experiencing is placebo. I know a fuck ton of people that believe it including my father but I assure you it does NOT change the rate of growth.

Can you post a pic of your beard?

I know testosterone and other things come into play but can stimulation of a shaven face have an effect? Of course once you shave, you are more inclined to scratch your chin which could possible have something to do with it.

Bruuh..

So if I try something, and it works for me, I should not believe that it works for me because it has been 'scientifically' proven not to work on others. 'scientifically' between quotes, because honestly all of them articles have as much proof as we provide on this thread, but then supporting our argument.

Oh, you're not planning it? Well, my gun seems to be suggesting the contrary, honey.

Nah, seriously, you're cute. Don't let the slut bitches get you down, bro. I genuinely believe the only reason I'm a faggot (well, mostly anyway - I'll fuck em but not love em) is because I just grew up around women and hated every one of them. In my experience, girls are often self absorbed, often unintelligent, insecure, boring, etc. Although that's a total generalisation, if you grew up in my circumstances you'd want to kill yourself at the notion of spending more than 10 mins talking to a girl. They're legit boring as fuck. I genuinely believe most men know this deep down but believe that, to quote someone I know online, the "pussy is too good, fam".

You know how old I am, right? Despite my blatant use of pretentious language that I impose on others to try and delude them into believing I possess a higher level of intellect (and, ergo, must be some wise old man with autism), I'm actually younger than most people think. Like, a lot younger.

I'm worried you (or others) would be expecting like a 50yr old man (if that's your fetish, cool; I'd just sad to disappoint). If I ever post a picture here, I'll try to make sure the background is a pile of books (Dostoevsky, Tolstoy, generic programming books, physics books, maths books etc.) as, hopefully, that will emphasise my clear spectrum disorder. Oh, I almost forgot, I'll include posters of railway trains in the background.

Most people I've met on here believe I'm like 40-50. So, $50 - 16 = 34$ year age difference is quite substantial. Take it this way, the circumference of your waist line is still larger, babe.

You don't have to be 50 not to be retarded, bro..

The fact you express yourself in a certain way doesn't mean people will think less of you if you don't look like you're 50. It's called being educated and well-spoken, sadly neither of these necessarily comes with age. Shit, I know 40-year old people, who can barely spell their name correctly.. they actually second-guess themselves.

Nah, the problem with my intelligence being correlated with my age is people, (especially in the psychological community (as I've come to learn), tend to graph it on the autism spectrum. I was diagnosed with Asperger's syndrome when I was younger so I guess this assumption lends itself to certain individuals.

Sadly, the internet makes quite the meme out of such 'conditions' so I keep it on the down-low. I'm a bit of a homo in the sense that I don't like to classify myself. Similar to Oscar Wilde, I refer to things about myself using the word 'nature'.

The problem with my nature is that it doesn't really do much for me academically. I cast off subjects that I should probably care about for subjects that get my brain running faster. My brain literally aches at the end of each day and I can't get to sleep most nights due to my brain thinking of lots of things at the same time at speeds comparable to the anal thrusting that kiasa's father inflicted on him as a toddler. It turns out marijuana levels me out which is good because the user 'kiasa' is genuinely a drug addict. He should have a few Gs for me to smoke when I come visit him (there's no ulterior motive cough homicide *cough*).

Just did the profile picture one you posted about, might as well do this one for the heck of it.

Kinda similar to my profile picture, except no front camera flash, has the dog filter though.

Warning cute man!!!
