How Does Work? Its Simple!

- 1- Frist Make Sure Ur RGH/Jtag Are Turn ON And Connected Whit Internet.
- 2- Open The Program And Press On Connect
- 3- Go To IP-Puller Section And Choose Our Game
- 4- Pull The User IP And Use a Booter To Turn Down The User Pulled!

Hey look its copy pasta from Xbox tool and tsunami

**Rickie** - September 19, 2016, 1:27 pm

Yes, that source is a direct copy and paste from Tsunami, no edits whatsoever to even personalize it, however, he credited Deadly Water so all of you calm down. Even though most of this tool may be copy and pasted, give him the credit for at least trying to create something somewhat useful. For future reference, don't use that shitty theme. It's overused and looks bad.

Cain and able worked wonders in my days lol scared the crap out of some kids.

**Sans** - January 7, 2018, 7:00 am

If you use xbOnline it comes with a IP logger.
