Thread: [Luminosity Link alternatives - A Free Much better RAT.](#)

Sterling Silver - September 14, 2016, 6:11 am

Google 'Skywyder MadCracka', It's the best Native RAT I've ever come across and its been cracked on leak forums. It has a Form Grabber/Keylogger and an expensive UAC exploit all built in, Plus it has a features for Crypto Currencies, Plus you don't have to worry about having your licence banned as there are no licenses.

It has more features then Luminosity Link and will never ask the Victims/Users for permission to install silently. ?

You probably own that RAT. fucking Scammer. Gtfo.

Pharmacist - September 14, 2016, 6:17 am

It's a shitty RAT, UAC exploit does work, but when I tested it, only about 1/2 of the features actually did correctly on all OS's. Also, MadCracka didn't crack it. You probably downloaded malware.

0x22 was the original cracker of the RAT.

I'd be careful doing anything what OP says.

He likely is, I agree.

Anyone who would download a file from LF without checking it deserves to be RAT'd tho lol.

Do NOT listen to OP. Skywyder is good only if you pay the \$500 for it. Other than that the cracks are useless

Not looking good.
Better take the 0x22 version

Even then it doesn't work. Waste of time unless you pay for it

iLogic™ - September 14, 2016, 6:38 am

Unstable and a lot of functions are not working...

Sterling Silver - September 14, 2016, 3:24 pm

Look I was trying to do people a favour since Luminosity Link and all of the other RATs have gone bad and I know that this RAT is good, This is a cracked version hence the scans, And all of the features on it work if you're targeting Windows computers, If they don't work for you then maybe you're doing something wrong. This RAT is miles better then anything on here, If you don't trust it then don't download it..

Everything in the program works so I don't really know what you're talking about.

xSuccess - September 15, 2016, 10:18 am

OP was messaging me telling me to check it out, Imfao.

im not touching this with a barge pole, usually i test stuff like this in VMware but i dont even have to bother with this.

Goodluck trying to backdoor people.

He scammed me by selling the rat to me and close the project 2 days after purchasing.

Also where do i purchase LTV Rat or IMTV Rat? Luminosity Team Viewer RAT or Imminent Team

Viewer Rat. I need it urgent
