Thread: [Guaranteed 100+ Traffic in Under 20 Minutes](#)

simplecity - September 14, 2016, 6:26 pm

Hey everyone,

I have been doing e-whoring for a little over a year now and I have grown quite familiar with the scene in general. A problem for many people, I've come to realize, is that they are unable to produce enough unique traffic to make use of their social engineering skills. You should not be losing out on money if you have the skills but can't seem to find enough traffic.

This is where I come in. Since day 1 of doing this, I have never struggled to get a consistent high volume of traffic which has been perfect for my method of ewhoring which requires me to have 200+ unique individuals add me each and every hour. I will be sending you traffic from the sources I have been personally using to make 10's of thousands of dollars so you can be assured that the traffic is quality.

The tricky part for me was coming up with a rate for my services. I know I've seen average returns from ~100 traffic using my sources to be in the \$50-100 range so I believe a fair rate to be about 5-10% of what you stand to make. This could change as I'm always trying to find what works best.

Rates:

Guaranteed 50-100 Traffic: \$4

Guaranteed 75-150 Traffic: \$7

As a note, you can expect to receive towards the higher end of the number listed and in most cases even more than that number. I've just been conservative with my estimates since I'm offering a GUARANTEED amount and I want to be careful to always be able to honor that guarantee.

I will be accepting Bitcoin or AGC. Please message me or post here if you'd like to use my services. Thanks!
