Thread: [How to get back slide to unlock on iOS 10](#)

Transporter007 - September 15, 2016, 1:47 am

Hey guys,

Does anyone know How to get back slide to unlock on iOS 10 ?

Regards.

Probably in the future after we get a jailbreak we'll be able to do this. For now, nope.

You should have your phone locked with a secure password and not be using slide to unlock.

Dude, Apple removed Slide to Unlock because they are simplifying the process of unlocking the device. Instead of two steps like it was pre-iOS 10, it is now 1 step. You simply press the home button once. If you have TouchID enabled, the touch of the home button will let you right in.
