Thread: [HOW TO LOCK FOLDER EASILY!](#)

domsh607 - September 15, 2016, 8:52 am

HOW TO LOCK YOUR FOLDER:

- 1) make your folder on the desktop
- 2) open your command line
- 3) type: cd desktop
- 4)now type: Cacls "Folder name" /E /P everyone:n

If you want to unlock your folder, type: Cacls "Folder name" /E /P everyone:f

Hope you find this tutorial as useful. ?

so does this just make the folder hidden on the desktop from everyone? and if i go into file explorer and click desktop will it show up?? or is it fully hidden?

Kali_GFX - September 15, 2016, 1:53 pm

Thanks for the tut mate !

domsh607 - September 16, 2016, 5:35 am

It doesnt makes folder hidden, its just set up on admin's password so nobody who doesnt knows the password cant enter that folder unless you unlock it.

Kali_GFX: Np :) Always glad to help ;)

jay1994: Yeah sorry... my bad I wrote it wrong. Now i fixed that so sorry

Cimex - September 16, 2016, 5:41 am

Thanks for the tutorial. I will be sure to use this in case I get raided

domsh607 - September 17, 2016, 12:00 am

One hypothetical question... can you dox me? I want to try how anonymous I am :)

One rhetorical question, how does this relate at all to the thread in any way?

masterkey12338 - September 17, 2016, 1:24 pm

another way to go about this would be the attrib command in windows

to hide: attrib +S +H "Folder/File.filename.something"

to show: attrib -S -H "Folder/File.filename.something"

this would set the folder/file As: Hidden System File/Folder which means its not even visible when you try to view hidden files in explorer

FractumSeraph - September 17, 2016, 2:11 pm

Lol, you've posted this three times...
