Thread: [League of Legends Account Database Website \[Guaranteed income\] \[Database Available\]](#)

Vevion - September 15, 2016, 4:22 pm

www.leagueaccountshop.com League of Legends Account Shop/Database

Selling a fully functional, and income generating League of Legends account Database website.

I made the website as hobby, and as a place to store all the thousands of accounts I got my hands on, due to lack of time and lack of interest I am now selling the website source and or domain/database.

With nearly 0 advertisement, and almost no effort in SEO or advertisement, the website generated a nice 400€ income already. So in the right hands this will be a major income source.

There won't be any vouch copies, so do not bother. I can provide proof of source to anyone who wants it.

Features:Automatic Account validity Checking

Stripe and BTC Payment modules (Paypal optional)

Overview of accounts including champions, skins and runes

Order tracking with logged in users

Guest checkout (Account's sent to payment e-mail)

Easily insert accounts

Functional contact us page

Detailed FAQ's

Freebie generator and freebie database, with automatic anti-leech protection. (Generates quite a bit of traffic)

so does this thing take out active/verified accounts? or you only check inactive/unverified on it?
interesting idea but never had much luck selling LoL accounts with playerauction chargebacks :/
