Thread: [Adsense clicks incosistency : Overview and clicks have different values](#)

shashwat97 - September 16, 2016, 11:07 am

Hey everyone,

So recently I've noticed while seeing my Ad performance in Google adsense that the number of clicks shown in the overview tab and number of clicks shown in the clicks tab don't match.

Has anyone else experienced this? What's the reason. The only logic I can think of is that click section shows clicks only on the CPC ads, while overview section includes the click on CPM ads as well. I'm not convinced though, and would like to know if anyone can confirm this reasoning, or provide the correct one.
