Bought a VCC from him that wasnt working.

Spoiler [\(Click to View\)](#)

He didnt reply after that msg, probably blocked me.

He also confirmed via PM:

He even said that he'd give me a refund but I have yet to receive it (gave him my BTC address):

Who scams for \$5.50? Well, if anything you can just get him RKO'd again by reporting him for asking for rep. (As long as you can prove that he owns that Skype account).

Damn, he must be really low life scamming for that amount.

His 3P1C upgrade costs more than 5.50\$ so he's stupid to scam even for that amount.

Sorry for your loss bro.

Lmao look at his rep why would you even consider making any kind of deal with him

This one is on you op

He only said he was going to refund yesterday, I'd say making a scam report is a little premature.

Why would I wanna RKO him if he only has negs and neutral reps :P

It was a mistake dealing with him, but I didn't think anybody is gonna scam for \$5.50 though.

It is not allowed. VCC and Shits! It is your fault for being careless.
