Thread: [Pinging and IP with a cydia app/tweak](#)

Asag - September 17, 2016, 8:15 pm

Was just curious if there was anything in cydia that would allow me to ping an IP like CMD. IF there is please let me know what it is called and how to use it if it isnt straight forward. Thanks

Madchild - September 18, 2016, 1:32 pm

Terminal from BigBoss repo

Loses - September 18, 2016, 6:12 pm

I didn't know you could still Jailbreak iPhones... Would you happen to know how I could? I paid for mine in cash with no warranty so I don't see why I shouldn't just jail break it.

<https://itunes.apple.com/ca/app/ping-network-reachability/id576773404?mt=8>

Way simpler, no jailbreak required, free.
