Thread: [\[UPDATED\]POODLECORP IS BACK?!](#)

kmz22222 - September 18, 2016, 7:58 am

So i was just derping on twitter and somehow i accidentally opened poodlecorp's twitter...

Now we all know in the thread that i have posted before:

<https://hackforums.net/showthread.php?tid=5404221>

They made a tweet and changed their website,They said that poodlecorp has officially come to an end right?

Now watch this shit:

[img]http://image.prntscr.com/image/cd4efc28419d46cd943bc3ed6a4f14ce.png[/img]

Someone tell me what is this shit.

Is this is a fucking some sort of comeback shit?

I don't really get it...

If you opened poodlecorp.org u will still see the end message:

Quote:The End

PoodleCorp has officialy came to an end.

Nobody has made us quit, but our own mind.

We thank everyone that have supported us.

Long Live Poodles #PoodleCorp #Summer2017

I don't really have an explanation for this,This must be some sort of a comeback.

I want to hear y'all thoughts about this shit.

Update: Btw here is Riot confirmation about the DDoS attack:

They said that they will "investigate" it and within about 19 hours they fixed their server.

Edit: Guys i have made my 40 posts in lounge,That means i can't reply to y'all :(
Fuck.

2nd Edit: Somehow HF system fucked up and i was able to reply to some threads,enjoy.

2nd Update:

So i was fucking again on twitter and i notices something really weird.

If y'all remember from this thread:

<https://hackforums.net/showthread.php?tid=5404221>

Poodlecorp end tweet was on sep 11:

[img]http://image.prntscr.com/image/b329b176cee54d81acdd41c0b0fcbbc0.png[/img]

Also on Sep 11 [The day poodlecorp said they "officially came to an end"]
"Phantom Squad" Tweeted out this:

[img]http://image.prntscr.com/image/668a0ce492704bc08119f0c9b36b8dea.png[/img]

Followed by those tweets on Sep 11 and 12:

[img]http://image.prntscr.com/image/a2af68aca9cd4a9b95d7381e243b9131.png[/img]

Are there any possibilities that phantom squad was the result of poodlecorp's end? if so then why the fuck poodlecorp is back? Do they want their enemies to fuck them up again?

Who fucking knows....

This shit is mysterious as fuck, there is something that we don't know here. [Possibly poodlecorp was hacked]

Also i was looking at phantom squad and found out this creepy tweet:

[img]http://image.prntscr.com/image/7e5b47bff08a4776880d39c4524c2227.png[/img]

What could possibly happen?

UPDATE 3:

Poodlecorp made it to scarce again.

No, the website is shut down by the Feds' and man members are being investigated by the FBI. Most of them are in the U.S.A and will be put in prision for a long time with multiple accounts of cyber fraud and doing illegal cyber crimes.

One of the members will not get arrested because he was working with the feds. He ratted them out due to not getting a cut of the action they scammed many people and the one member never got a cut and decided to rat them out.

Don't get me wrong - it isn't super difficult, but your statement sounds really naive.

lol if they go to jail thats pretty sad, all they did was downing some games (im not saying they are begginers, just that they did it for fun and some money/attention, and yet they will spend many years

in prison, sad) but the fact that som1 of them spammed their face in social websites is even more sad

The only thing that's sad, is that you see it this way.

They take down bigger game servers. Make them lose money etc.

If I rob someone for fun and some money/attention, is it sad too that I will spend time in prison?

how long LoL server was off? anyway i guess you are right, but still, whole group goes for many years for couple hours of servers down? is that fair? another thing is that, probably only applejack fukd up, and then whole group boom goes to jail. Also I heard in USA you get a lot of years for hacking much more than in other countries.

I remember reading article where someone in USA hacked the cameras and recorded how a girl was raped by football team, they didnt get any problems from it while he went for 10 years or 15.

It's not naive, what they did isn't impressive. Anyone could do it if they give it a few practice runes.

Can I do it? No, at the moment I can't, why? Because I've never done it before and haven't attempted to learn what it's like.

Now they're "back" with some tweets, maybe they just bought a new booter api.

anyone know who's behind PoodleCorp twitter? I only know who's behind LS's one.

And let's be real, what PoodleCorp really did was using a stresser-api & logging into youtubers accounts with login details from LeakedSource...

Please ignore the PhantomSquad skids, they are so fucking cancer & retarded.. srsly don't spend attention.

In the past many attacks "tweeted out by ls & poodle" were made by AppleJ4ck in the background. You could see that on his twitter, he had not much followers at that time, but he posted images & made tweets about preparing attacks and stuff. And people from vDos know that he always had rllly good attack power.

Now they're "back" with some tweets, maybe they just bought a new booter api.

anyone know who's behind PoodleCorp twitter? I only know who's behind LS's one.

And let's be real, what PoodleCorp really did was using a stresser-api & logging into youtubers accounts with login details from LeakedSource...

Please ignore the PhantomSquad skids, they are so fucking cancer & retarded.. srsly don't spend attention.

In the past many attacks "tweeted out by ls & poodle" were made by AppleJ4ck in the background. You could see that on his twitter, he had not much followers at that time, but he posted images & made tweets about preparing attacks and stuff. And people from vDos know that he always had rilly good attack power.

Do u have any proofs that poodlecorp didn't use anything but vdos?

What about the "botnet" that xo was talking about?

And k fine i'll ignore phantomskids

PoodleCorp's stresser got "hacked" with the same type of vulnerability as vDos got. Brian Krebs & some other people showed screens of the PoodleCorp config file for the api-servers, which basically pointed to api.vdos-s.com.

Also there was a guy on HF here, which claimed that Pein [former @fbiarelosers on twitter] who's behind the stresser, gave him box access for setting up a paypal-api & then he dumped the whole db and sold it to some kid.

It's interesting, every time someone does something, people are always like "No, that's not REAL hacking". In the [censored] days, they weren't "really" hackers because they used SQLmap, and now social engineers aren't "real" hackers for some reason either.

The pool of what actions constitute a "hacker" continues to grow smaller and smaller daily, as unknowledgeable kids consistently seek to invalidate the actions of others.

Not that I condone such activities, but it's an interesting observation nonetheless. We're already at the point where no matter what you do, even if it's "hacking" in the classical sense, somewhere, somehow, somebody will call you out for "not being a hacker".

If you can't in under 1 minute my point has been proven

You're a nobody who keeps repeating the same insult.

Go back to believing your internet idols are real.

I know your daddy died so you need to find another male role model

I know you know nothing about networking as you're clearly a fan of phanom squad
Which is nothing more then a shitty wannabe group of paki children who do nothing yet you're idiotic enough to believe them

Retard explain to me what reflection attacks are?

What makes the network time protocol vulnerable to being used as reflection

Simple question

Answer.

If you can't in under 1 minute my point has been proven

What are you talking about wtf?

I'm not a fan of phantom squad,i don't even know 1 name of their members ?

Who said that i believe them? And btw why are you saying that i'm idiotic when you are the main source of cancer and nonsense?

Please do me a favor and stop replying to this thread.

Someone ban this kid guys wtf

The topic is just about poodlecorp and outta fucking nowhere a 10 years old kid comes and say:
OH KMZ OHH YOU DON'T KNOW SHIT CAN U PLS TELL ME WTF IS REFLECTION ATTACK SO
U CAN PROVE U R A HACKER?

You are telling people to kill themselves while you are the one who should do it. :)
