Google is very helpful - use it to your advantage.

You can do this with your .htaccess file.

Just change the home2 directory in your ftp manger.

People always seem to forget that some people actually just do not know what to search for. PM me if you need help with anything else.

It's lenient with the searches because it can pull from MyBB's forum where people may say the same thing you'd say so it's still worth a try but yea, no problem. Haven't touched MyBB in over 4 years else I'd offer to help you directly but I'm rusty. Good luck!
