Thread: [Shield Crypter 2017 \[.NET/Native Compatible | USG | 99% ExecRate | Autobuy | FUD \]](#)

The Anonymous - September 18, 2016, 3:33 pm

By Purchasing this product you agree with the TOS:Spoiler [\(Click to View\)](#)Quote:1)You will not publicly share the source code. The source code which you will receive upon purchasing is for you and for you only.

2)You can create new crypters from the source code and sell freely, but I would prefer if you PM me the thread link.

3)When it becomes UD, you will not ask me to FUD it for you. You understand that it is your job from now on!

4)You will not use this product for illegal means.

5)No refunds.

FAQ:Spoiler [\(Click to View\)](#)Quote:1)In which language is this written?

Visual Basic. Stub is compiled in .Net v2.0

2)Does it support BlaBlaRat?

If it is native, then yes.

3)Can I use this for crypting service?

If you tweak the stub, then yes.

4)Can you help me with BlaBlaBla?

If I have time and you ask nicely. :)

Huge vouch for T4RZ4.

Received the crypter and full source instantly.

This is perfect for someone who just needs a crypter or for someone or is ready to start selling a crypter.

GLWS!

Skidsuper - September 19, 2016, 4:27 pm

I bought this and got the product. Will review after viewing the codes.

A normal net stub, coded properly will go from 20 kb to 50-60 kb max.
Anyway, good luck seling this.

OP you got nothing to say about this ?

Why avoid it?

The Anonymous - October 24, 2016, 1:46 pm

This is a sales thread not support thread.

I have tens of customers, if my crypter was shitty you could have seen it on my threads, rating, or etc. When a customer needs help, and asks for it, i do help as soon as possible.

If you get detection or just need help, you NEED TO PM ME, not post here.

jashi420 - October 24, 2016, 3:33 pm

No longer FUD, giving me 16/35. Do not recommend this product, unless OP updates crypter.

Polymorphic runPE works by, generating a new and different runPE code execution for each crypted file in the stub.

Polymorphism != string renaming.

Shanonnn - January 2, 2017, 1:23 am

Stop selling this please. It is already leaked.

Nothing about it is polymorphic. False advertisement.

Not good.
I am sorry for your loss.

Benoit balls - January 2, 2017, 1:33 am

Do people really know what polymorphism means?
[https://en.wikipedia.org/wiki/Polymorphism_\(computer_science\)](https://en.wikipedia.org/wiki/Polymorphism_(computer_science))

When people say their crypter is polymorphics, they actually want to say it's metamorphic (https://en.wikipedia.org/wiki/Metamorphic_code) or they're just trying to take advantage of users who don't understand.

I wouldn't even call that a real metamorphism :D Well, actually it is called that, but still - string renaming, pffffff :D

Never said his crypter his metamorphic, Frankly i don't think there is 1 crypter on this forum that is really metamorphic.

I apologize to those who do have a metamorphic crypter in advance.

This seems like an awesome deal for a crypter along with the source code, so you will always update the stub as well?

The Anonymous - March 15, 2017, 7:43 am

Yes. Crypter is regularly updated.

Be aware this user sold me the full source and everything for this crypter and claimed it was fud and that he would keep it fud. Sadly when I first scanned my crypter server it already has 12 detections. It's been like 6 months now and still no update...

I will remove this post if op gives me a new stub or if the crypter gets refudged

Use HQ icon and custom assembly information. These are Generic "GEN" detections.

Leaked version is a year old, not FUD and encrypted, meaning source code is unintelligible.

To purchase new FUD version use the following link:

3)When it becomes UD, you will not ask me to FUD it for you. You understand that it is your job from now on!

What does it mean " Lifetime Updates " if you can't REFUD ?

Polyphormic Runpe what does mean exactly ? is it unique runpe everytime ? is it fud runtime ?

i am asking because i dont know those things.

It doesnt mean that no updates are issued, it just means that if you are a dick, or an asshole, i can just not share them with you.

Yes, it means it is unique runpe, everytime it gets crypted. Shield Crypter is both Runtime and Scantime FUD.

Hey,

I tried crypting a miner with this crypter but windows defender still sees malware. Please advise.

Wow, looks really good. I might buy this project? How much costs?

GlassSkull - December 22, 2017, 6:03 am

I spoke with The Anonymous and bought selling rights to this project.
Effective imideately BTC payments are suspended because of high transaction fees.
BTH, ETH, LTC payment methods have been added for faster transaction.

There might be problems by the main website shieldcrypter.com, because of SSL certificate update. However sales are continuing normally on selly

GlassSkull - *December 28, 2017, 9:08 am*

SSL issues on the main website have been fixed. Sales are continuing as usual.
