Spoiler ([Click to View](#))[Video: <https://www.youtube.com/watch?v=aygl5789UgQ>]

FREQUENTLY ASKED QUESTIONS

Spoiler ([Click to View](#))Q: Can this program hack any account?

A: Essentially, yes, it can hack any account on the four platforms included. You can make it target whatever account you like!

Q: What sites can this hack?

A: Facebook, Skype, Twitter & Instagram. Plans to add more in the future.

Q: What else does this include?

A: It currently includes a proxy scraper inside the program as well as a combo list creator, and we have plans to add proxy checkers etc.

Q: Do I need to purchase anything else?

A: No, you don't need to purchase ANYTHING else! Everything is included!

Q: What if I don't have the target's email

A: No problem! All you need is their username (even their facebook username @facebook.com) and you'll be good to go!

Why would anyone pay for this if there is only 4 types of accounts you can crack?

Ganie - September 29, 2016, 8:10 am

I paid \$40 for Skype Jacker Plus \$15 for proxies fro him(Monster Proxy) and it's been 8 hours, i got 0 Skype accounts hacked till now. Is your product better than his ?

Skype-jacker says a lot of things. but when i used it, it's slow.

It has a built in dictionary of 10,000 and in 3 hours i got 1000 resolved till now.

Shitty and super slow

Well, I have personally never used Skype Jacker so i can't tell you if our product is better or not, but this has multi threads etc to ensure speed.

Speed is highly dependant on connection/proxy speed as well as the amount of threads you use.

From personal experience I'd say Social steal is better than skype jacker. Not only because Social steal has multiple options, it's also very reliable and smooth.

Has a good reputation.

If you are as much a newbie as I am, you are going to need a lot more help than I have gotten from Tick. I paid for the program on Sunday and I thought I'd get it in a few minutes. When it didn't come, I emailed him about it. I finally got a response on Tuesday. I got one file and a password. No instructions. I made sure I have NET framework, as mentioned above, and I installed Visual studio. Managed to load the file in Visual Studio, but can't find how to run it. I'm sure just about everybody who has commented in this thread knows how to run this file. I don't. Tick has offered help on Skype and email to people who have posted in this thread. So far, I have sent him 9 emails and 1 Skype contact request. I haven't gotten one bit of help. Tick has received a lot of praise in this thread. He probably deserves it but my experience has not been praiseworthy at all.

All in one package, it comes with a combo creator and password lists, so all you need is the username of the account you want to hack!

Hey Tick, quick suggestion:

Have you thought about making a support team? The only issue I have with Social Steal is the limited support, although it's well up to standard when you do reply, 4-5 days for a reply is a very long time for a user who may have bought the one week package.

Surely there is a few people you know who would help you out? It's just a suggestion honestly, I'm not hating nor disrespecting your service as it's truly amazing, just need to figure something out for the support.

This Does Work But It Is Like A Mix And Match You Need A Password List Containing Around (2145011) Lines Then It Takes Time When I Say Time The One Week Fee Is Not Long Enough To Get Into 3 Accounts And No It Has Not Worked For Me (Yet)

iammachine.915 - November 9, 2016, 7:19 am

So, is it like Hydra for lazy people?

MrNoc - November 9, 2016, 7:33 am

Never Tried Hydra Cant Say

iammachine.915 - November 9, 2016, 7:38 am

What i can tell you about Hydra is that it takes a lot of time, and i want to try this tool because it says it is kind of quick and includes everything, since i can not be seen using this kind of things at barracks, i have already been called out for using other social engineering tools. So, anyway, it does not even include the wordlist?, i Mean even with a wordlist it is still a 50/50 chance to get the password ot not, and i really need it quick, so, if you could tell me what does the lifetime one include i would really appreciate it.

As I saw on other posts it includes everything including wordlist too you can start hacking account right after download/install. I am saying this becuase I have read some posts on this thread

iammachine.915 - November 9, 2016, 8:07 am

Thank you for your response but, since it is not just a download but an actual purchase, i hope you understand why i would like to know from someone who has already purchased it, depending on their answers and if i buy it and it works for me i will let you all know with screencaps included, because that is what i would like as a proof.

I purchased the LL, It does not include word list.or am I missing something?

iammachine.915 - November 9, 2016, 11:18 am

Should i give up on trying to buy this tool or can anyone answer at least one of my concerns, because not even the creator i answering. Best regards to the creator and the community, i am not upset, i just need it ASAP.

dude wordlists can be found all over the internet theres nothing special about the ones that come

with the tool.

may i recommend you - <https://github.com/Mebus/cupp>

its a password profiler, super easy to use an you can generate your own custom wordlist rather then someone else's. i make my wordlists with cupp, an brute force with ticks tools.

I appreciate all the answers, specially this one, and i am planning on buying it after i get off work. Just two more questions if you do not mind answering, i emailed him and added him on Skype and i got no answer back so far but an automated telling me how to buy it through bit coins, (Which i already know how to buy his tool), i would like to ask him through Skype a couple questions, and the second one, for an average person's account, how long would it probably take?

Yeah, let me know. About the purchase, it is about to give me a headache since the only response i get is an automated message giving me the BTC wallet number and the ammout to pay. I need an answer man, chat with a real human being, not an automated message.

I'm very skeptical. What if I want hack Justin Bieber's account or another celebrity account? Before I

buy this I need to know:

- 1- Limitations of this product (can I hack famous accounts or inactive accounts?)
- 2- Will it get patched (i.e will it stop working at some point someday)
- 3- Does it work on mac?
- 4- Is the setup easy for a hacking n00b?

Thanks.

Depends highly on the speed of the proxies and your own connection speed. Try raising the threads to around 50 or so.

Computerjul - December 12, 2016, 3:32 am

how does this work ? I tested with a combolist with one correct combination and with one correct combination an a few more entries. username:pw. both with and without proxys. After "working" it successfully tested the combos but without an correct entry. Whats the problem ? Tested with Skype and Facebook. :)

just added u in skype kuli_j

SumoWrestler - December 12, 2016, 10:10 am

Question: Instagram will automatically change your password to something that's EXTREMELY complex if it notices frequent login attempts. You then are forced to reset the password. Facebook basically asks for 2 step verification if you login from somewhere outside of your state. Would it be safe to say cross site scripting is more effective if you can phish your victim?

Bought lifetime package, but the tool isn't working like expected.

I did a few tests on my account with 30 combos (and my password in 27th position), and here is the result :

- With no proxy, the tool went through the combos and did not find my password
- With proxies (from the proxy scraper) : I'm still waiting ...

So am I using it wrong ?

Would you help me resolving that plz ?

Thanks !

Same exact thing is happening to me. It's not detecting any of my own passwords for any of the configurations.

Is this tool working for anybody? Does anybody have suggestions on how to get it working?

Thanks !If you are testing with 30 combos, you would need to use proxies. It sounds like your proxies are not working with the second attempt though.

Email me and I'll try to sort this issue with you! ?

All my proxies were manually checked, and after like 5 min, the tool just display "all combos were

successfully checked" and my password isn't found.

I'll drop you an email to see what's going wrong.

i have only gotten around to using this program since i bought it (about a month ago) i have been trying to crack 3 accounts in one combo list of 1 million passwords, it's been about 24 hours and nothing. i'm not even sure how far it has progressed through the list since this is all i can see:

would it be possible to add something like this in the progress bar as to which user/pass combo it's currently trying?

How long does it usually take to go through the list with 1 million usernames / passwords?

1] No, this program will not make people do that.

2] It's possible if you know how to secure the account properly.

Quick question, I bought the program, but I'm having trouble with the password list. I downloaded the 487 mil password list .rar here on hf and I converted it to a .txt for your program. Unfortunately your program crashes everytime that I try to use the combo (since it is such a huge file). Any help? I also can't use any program that I know of to view the list and copy/paste. Thanks so much.

Update: Same thing happens with a 241 million wordlist

I am reading about FB accounts getting blocked? What if they have the security setting that sends a PIN via text to login? Doubt there is a bypass?

My main target would be IG. I read conflicting reports about the app notifying the user if the account is logged in at another location while they are logged in (some say GEO matters). This account has been used in my house and I would assume I would be connecting via the browser rather than the app itself. Any insight on that?

So I used it a few hours ago just to test it out to see if it works ... I had a list of usernames and ONE password which is my password for my IG account that I included in the usernames list ... I don't know what I'm doing wrong but it stayed on "working"and didn't move. Yes the proxys I was using was working fine and ALSO one very strange thing happened ... I just woke up not that long ago, I checked my IG account and it says some has tried to acces my account from the United Kingdom and that I had to change my PW, I know this wasn't me because of last night since I don't eve live in the UK ...

It's a good tool, I couldn't use it to its full extent cos a complex password needs massive, relevant lists (that I couldn't find), and a faster, more powerful computer than mine. But it does what it says on the tin and Tick's support is spot on. Well worth a go and would definitely recommend!

lolevel - February 21, 2017, 7:28 am

This is a very well developed app in my opinion. Props!

I am constantly getting things like this in the log...

Hhhhh@blah.com : 17&=[/?×^=

Hhhhh@blah.com : **[[[=<&&_#8[?

Hhhhh@blah.com : wwwioj : xko@yo.com : dj100

So in my example im running against Hhhhh@blah.com for say Facebook. Now as i go down the log every once in a while i will see something like line 3 in my example. There will be a seperate email account along with a data set after it as well.

Can someone explain this? Are these accounts that are somehow linked to the main account being ran against?

Thankz in advance

I'm new here and I'm not advanced in this stuff so excuse my ignorance. Here are some questions maybe suggestions:

- 1- Does this use a file of usernames so you can automate the whole cracking thing or should I put them one by one??
 - 2- Can I use the gpu power to make the cracking process fast or it doesn't have a significant impact here??
 - 3- Can I use my own pwd list??
 - 4- Do you have a linux version of this??
- if it's all good just say YES.
Thanks

Social steal is currently working amazingly. Will be responding to all emails in the morning!

TheEliteDGP - March 18, 2017, 5:41 pm

Note: the proxies are from all over the world and instagram has implemented a method of blocking these proxies. So you have to find proxies from your country... rip.

Vouch for Tick. Programs are easy to use, and help is available for anyone that needs it. Highly recommend!

insrt - March 19, 2017, 5:51 am

bought it... was kind of a waste since sentry mba can basically do the same but whatever i guess it still works

joooooon - March 19, 2017, 6:03 pm

just purchased lets see how it goes

fishandsnail - March 19, 2017, 8:44 pm

I'm considering purchasing this but need some definitive info as to whether this really works or not.

Otherwise, if someone can hack one facebook and one twitter account, I'll pay for the service.

PM if you can help out!

Lol i bought this and never used ! Hope i can use this in the near future !

TICK ! karthikraj220302@gmail.com <---- This is my Skype I hope you can help me set it up(Its tough af for me cause this is my first time)

Thanks ?

Jøjø - March 20, 2017, 6:23 pm

Vouching for tick, his tools never seem to fail. Thanks!

fishhandsnail - March 20, 2017, 9:30 pm

Is there anyone who has used this recently and can give an appraisal?

If I knew it was easy to use and worked, I would buy it in a heartbeat.

Responded to all emails, program is working flawlessly. Email me on tickcontact@gmail.com if you have any issues with the program!

mlgnoscope - March 22, 2017, 4:05 am

Hey, i have some questions regarding your program

- 1) Do i Need a good set up? (hardware). What do you recommend of a set up
- 2) Internet connection ? (what's with that)

Last time i purchased something similar, it took 1 week to crack 1 fb account

Thanks in advance

azert0 - March 22, 2017, 8:21 am

is it a brute force attack and is it fast ?

Sent you an email today.

Fundino - March 22, 2017, 8:31 pm

This looks cool maybe I should try it out

fishhandsnail - March 22, 2017, 10:48 pm

To clarify, all we need is the name/facebook link? The program will find the email and password?

Yes, correct, that's all you need! ?

vokolors - March 23, 2017, 2:30 pm

is this tool working like your other one?

Bet - March 24, 2017, 1:01 am

Fixed the licensed quota issues, let me know if anyone is having any issues!

Can anyone confirm this software is still working?

Also OP (Tick), just two questions.

1. If the software is not working for us for some reason and you can't help fix it, do we get our money back?

2. Does this work with larger lists? Whats the average list size you recommend?

Inglor - March 25, 2017, 8:15 am

Are you ever going to add minecraft to this?

1. Yes, of course i will always refund if you are not satisfied with the product.

2. Yes it can support larger lists, whatever your PC can support.

Vouch for this great product. Works really well, found so many of my own passwords with this which I never expected.

Thanks a lot Tick.

Damn this is really nice, I like the idea of multiple modules for one cracker.
