Thread: [\[SHARE\] Ratatouille icon pack generator](#)

©Ratatouille™ - September 19, 2016, 10:10 am

Hi,
Welcome everyone !
I share with you today a small tool to make icons pack.

The methods is easy you pout the wanted numbers of icons in the textbox, click grab and let the magic be done.

A icon folder will be created a the root of the tool with in it the icons.
It will be a easy way to bypass all freaking shitty generic detections because their are HD icons.

Im stress testing this thing to drop 1k icons. I'm sure it'll handle it just fine! Great tool, and amazing icons. Thanks!

EDIT: Ran the program to drop 1k Icons and it did with no problems! Here is a few of what I grabbed. Some in there definitely good for spreading ;)
