You can try this, but read the thread carefully so you know what you're getting

The best ebook, is no ebook at all.

For 11\$ I can write you an Ebook (private) that will teach you how to go to school, learn and find a job.

For an extra 2\$ I'll make it the color you want.

Don't fall for ebook scams, they make money by having you buy it not you

He's 15, he already goes to school and is trying to learn right now. Also too young to legally have a job in most places in the USA if he even lives there. What's wrong with trying to make some money online in his spare time?

djordjamayna - September 21, 2016, 4:49 am

Concidering you are 15, you maybe have played League Of Legends. I can offer you an e-book how to make money of the game :)

Major League - September 21, 2016, 2:57 pm

Don't buy an e-book. I appreciate your entrepreneurial spirit, but I don't think you're supposed to be or should be on this site at 15.
