Thread: [Spam bot for 123 flash chat room](#)

butch80 - September 20, 2016, 6:34 pm

I didn't see a marketplace/hire area. Please move this if necessary.

I will pay for a bot that can spam 123 flash chat rooms. (examples: teen-chat.org, chat-avenue.com).

If possible, the bot will use a proxy list file, generate random names of 6 to 10 characters (i.e. the number of characters entered into the UI), and randomly select messages from a list file.

The direct URL to the room will be provided (i.e. in the GUI) so that the bot doesn't need to go through login menus.

The general idea is for the bot to get a proxy, log into the room with the random name, post a message from the list, close/quit out, wait X seconds (i.e. this is entered on the GUI), repeat.

The hard part, from what others, who told me they couldn't program this, said) is to access either the flash (.swf) interface or the html (web sockets) interface. I'm not a programmer, so I don't know exactly what those mean.

Please PM me with an offer if interested, along with contact info (i.e. Skype).

If this violates the rules, please delete it. Thanks.

Butch

Marketplace is literally one of the tabs on the home page.

And yeah, the fact that it's flash is kinda harder to pull off.

Thanks to you, I found the market. It won't let me post there until I have a "positive reputation." Anyway, if only the mobile/html side can be done, it will still be useful.

Moderators: please close this thread. I found somebody who programmed exactly what I wanted. Thanks.
