Didnt meant about that.

Do you give info to avs.
Like virustotal?

No; we don't personally send them or anyone else any files; if any ends up in their or someone else's hands it will be the result of the person scanning the file

Just wanna say you have the accent of a doge (distributing is changed to disturbing, replying changed to replaying etc)

Might wanna use doge speak.

I do not distribute or log any files. No files are ever even stored on the server; only temporary for scan

You're a fucking scumbag. All your scanner does is scan the file on Virus Total then takes the results and exports them to your website. Want proof? Scan a file on his website, then scan it on VirusTotal, it will have been scanned just minutes prior.

Quit crying it doesn't say anywhere that it doesn't do that. If you weren't infecting people it wouldn't matter

"Anonymous Virus Scanner"

"I do not distribute or log any files."

You lead people to believe they're using an anonymous file scanning service. Anonymous means the file is not distributed. You are misleading people.

I don't use malware at all. I just like to call out scumbag pieces of shit when I see them.

Actually right fucking here you say it:

Ok scumbag, continue getting wrecked in YT videos and making shitty tools.

To be fair, you didn't make shit either. All you're doing is pulling results from VT and displaying them on your own site in hope of making people think you did something. Scumbag.

Just did a test. This does infact distributes.

I would NOT use this if I were you

Mr. Robot - October 14, 2016, 6:41 pm

God I love this.

#Skyline - October 14, 2016, 9:06 pm

Do not use this service, OP has no idea what he is doing and is distributing your malware if you upload it to this shitty service.

I hate autistic children like you OP.

Autist - October 14, 2016, 9:13 pm

Dumb ass user saying "Non distributing scanner" I hate liars

Cloudcrypter is shit

yotoprules - October 15, 2016, 5:46 am

I just tested this, it does infact distribute to virus total. Just scanned a clean file and then scanned it on virus total and vt said it was already analysed 1 minute ago. Do not trust this.

xHeaven - October 16, 2016, 3:29 am

This site just using a VirusTotal API. Do not use to scan stubs or etc.

Mad™ - October 16, 2016, 2:35 pm

IT IS DISTRIBUTING ! STOP SCANNING ON ORCA.TECH IT IS USING THE API OF VIRUSTOTAL.COM

If you want to test, create a simple C# file with a random Console.writeline(), generate the sha256, try to navigate on

<https://www.virustotal.com/fr/file/{SHA256 HASH HERE}/analysis/>

Error 404, the file is not scanned, now scan it on Orca.tech, and go back the virustotal, no more 404 error but a nice result page...
