Anyone who succeeded on finding help from someone who could find the password of a skype name provided? I'm desperate in need to know the password of a skype account I would like to access. If anyone can help me, please write me here or message me. We can go to skype or chat via mail and go through the procedure.

Any help on this would be much appreciated!

Thanks a lot!

Key - December 10, 2016, 11:17 am

You can just search up some db lookup to get his password or just use a resolver to grab his ip and you can lookup with his IP too, to get her/his password.

Thank you for the message Jack Wilson!

Since I very new to this and cannot get anything you are saying, is there a way to talk and explain me what to do? In case you know a trustworthy user who can help me on hacking the password of the account im looking for, i would very much appreciate your help! We can talk via skype or mail if it is easier for you!

Thanks again!!!

ok! thanks for the response! Let's hope there will be one coming out soon!

Loco1981 - December 11, 2016, 7:59 pm

All the new versions of Skype that get released by Microsoft are set to hide your IP address by default. ?

Dr.Schere - December 11, 2016, 8:17 pm

With Skype resolver you will not be able to grab IP,database ,email any more.
Srry bro?

I am willing to pay for skype hack good money. Please pm me.

Wilwarin - June 16, 2017, 3:57 am

Can anyone help me too? I need a password of a Skype account

Harris2000 - June 17, 2017, 2:55 am

+1, I am hunting for this also. I know various details about the account. If anybody is able to gain me access to a specific account without changing the password, I will pay good money. Must be proven (I know contacts on the target contact list, so a screenshotted contact list will work). Please message me with quotes or for further information.

Hi guys, same old story. Please could someone help me, my gf told me she uninstalled Skype from her tablet to make space because she does not use it. But I managed to get a look at her Google history and when she goes to work she goes to play store and installs Skype then uninstalls before she comes home. Please can someone help me get a look at her chats so I can know if my relationship is worth saving. I only have her user name, possibly can get email. Alternatively if anyone can tell me how to get saved passwords of a galaxy tab 3 but would have to be a 5 or 10 minute job. I am desperate as most people are, I have know of this for a few weeks and it's eating me away. Don't know how you guys get in touch but my email is Paulh2007@hotmail.co.uk and line id is Paul.pattaya1

Thank You if anyone has the time to help. Sorry I dont have money to pay, times hard right now.

hi guys can anyone help me how to hack skype?i know his username

Without the victim notice. this is the main goal. the user is on another place/country

A print screen of one of his chat before send the money worth \$200+

maybe bruteforce?
