Thread: [RichTextBox Scrolling by VScrollBar](#)

justas69002 - September 21, 2016, 11:06 am

Hello everybody,

I wanted to know how to make scrolling up and down with the VScrollBar and not that of the VScrollBar of RichTextbox because I travailk on software currently in Flat mode, but the VSscrollBar does not please me too: /

So I decide to change and found a VScrollBar I changed Flat fashion, so I wanted to incorporate and bind on RichTextBox.

So my question is how do to a linked VScrollBar with RichTextbox, thank you and sorry for the inconvenience.
