Thread: [Post didn't show up on the thread but it does in my posts list](#)

Raleway - September 22, 2016, 7:49 pm

I just made a post around 15 minutes ago and tried to go back to it but it doesn't exist for some reason, the post is in my posts list and it shows up there even after I refreshed and tried using a different computer..

Post list view-

image is big ([Click to View](#))

I clicked on my post link but it just redirects me to the main post made in the thread, here's the link.

Post is supposed to be on the bottom of page 4 and OP posted one at the same time I posted mine so it's supposed to be at the bottom of that page. Check the time(s).

What could it be? ?

(Tried clicking on it but it just redirected me to the main post of the thread.)

It also shows up as the last post.

How long did yours take? It's been around 20 minutes now.

NVM It showed up, sorry. ?
