Thread: [hacking facebook and whatsapp by using ss7 flow](#)

johnripper - September 25, 2016, 7:51 am

Telegram and WhatsApp are both known for their security and end-to-end encryption and latest forward way secrecy techniques which secure end user data in a good manner. All these security features still doesn't stop hackers from Hacking into WhatsApp or Telegram using a very known and old exploit of Signaling System 7 (SS7) .

SS7 Exploitation has been discussed many time in the Forum , In this post I will just show you the Live Hack Demo and how accounts are taken over. Check out the Video Demo of WhatsApp hacking (Telegram Technique is also SAME)

video link:

<https://youtu.be/qPPWQbGTptQ>

How the Hack is executed ?

Above demonstrated hack DOES NOT break WhatsApp and Telegram Encryption rather it exploits the weakness of SS7. This is done by tricking the cellular network into believing that the Attacker's phone has the same number as the target's. From there, the attacker would create a new WhatsApp or Telegram account and receive the secret code that authenticates their phone as the legitimate account holder. Keep in mind this technique would literally work on any Network and any Online Messaging Service , once you spoof the number you can pretty much do everything.

Will SS7 Vulnerability get Fixed ?

SS7 is a global network and not owned by any particular company, nor it can be rapidly patched through out the world. It's a mess, and it'll remain that way until someone, or a group, is appointed to govern and maintain it, which is very unlikely to happen

Until then, Hackers will Enjoy .

Another theory hints that intelligence agencies are the real cause between the vulnerability and Cellular networks ability to fix it. Having a weakness to spoof and clone every phone on the planet is a very eye candy option for all Intelligence Agencies which would not think for a second before invading our privacy.

Update :

Download MAPS and SS7 Protocol Simulator

Open GL.com and register for a Free Account

Activate your account by clicking the Email received.

Once account activated visit This Link

Download MAPS™ SS7 Protocol Emulator and MAPS™ SS7 SIGTRAN

Usage you will have to understand .

SaintAres - September 25, 2016, 7:58 am

So this is working? Thanks for the post.

Dr. Michio Kaku™ - September 25, 2016, 8:54 am

Can you help me better on that?

Like setting things up and all over skype or here.

Thanks for sharing!

Mr. Corleone - September 25, 2016, 9:36 am

It's easy to catch someone using this, so i'd be careful if you can even set this up.
Good luck, lol.

oppkern - September 25, 2016, 3:31 pm

Thank you for sharing this, but

not really useful...

1. After the hack the attacker cannot read the past messages, cause they are saved on victims phone.
2. The victim sees that he/she was disconnected and will reconnect again and the attacker lose control, etc...

The only gain, is that the attacker can see and write in the meantime to the contacts of the victim.

Dr. Michio Kaku™ - September 26, 2016, 12:21 am

Oh really! Thanks for sharing with us.

I tried to download Download MAPS™ SS7 Protocol Emulator and MAPS™ SS7 SIGTRAN, but it required a key before you can download.

johnripper - September 26, 2016, 9:15 am

Ss7 should be difficult to setup and use

oppkern - September 26, 2016, 11:18 am

try to find a key on youtube.

iUpgrade - September 26, 2016, 11:36 am

That's a fake video, did you saw the call in the victim's cellphone or an sms?

Most likely he used 3 cellphones to fool us,

1. Victim's phone
2. Friends phone
3. Hacker phone

He already had a verified whatsapp account in 1st phone, then he took out the simcard and inserted it into the other phone (3rd one) and

the part where he claims to forward the call is just for making us fool because he had the same number simcard (victims) into his hacker cellphone (3rd) and that's why he received the call on hacker cellphone.

If it was real, tell me why there was no call or sms on the original victims simcard?

10RD - October 4, 2016, 8:19 pm

Doesn't we need hardware to exploit ss7 flaw?

wapfalls - October 5, 2016, 4:07 am

This is cool, and seems legit,
will check this out.

Fantom4242 - October 5, 2016, 4:20 am

This is an interesting exploitation, I'll stick to this thread for future reference

johnripper - October 6, 2016, 11:04 am

citscloud - October 6, 2016, 12:46 pm

Thanks for Sharing this....

Jared96 - October 6, 2016, 2:27 pm

I'm not that advanced, did anyone who tested it out find a way to make it work?
Everyone keeps saying "I will test it out" and then disappears :O

Fantom4242 - October 6, 2016, 2:28 pm

Everyone keeps saying "I will test it out" and then disappears :O
Because it is rather stupid to think that the exploitation wouldn't work. There's absolutely no logic behind that ideology.

SchwererGustav - October 15, 2016, 3:30 pm

well no one here have i think the ss7 scanner, this turned me to 0 now , i also wanted to open the map website but it s blocked and vpn can t play it around

Mewtw? - October 17, 2016, 4:01 am

Has anyone success with it ?
It does not look hard once you have the tools

Impossible to find a serial online tho'

asmith244 - October 18, 2016, 7:39 pm

WTF, why you need serial and for what, re-reread the post again and again,till you understand english.

Just imagine to make calls on phones do you need some fucking serial or sim card and balance of telecom operator.

You need first sigtran access to connect with and start.

mamydo - November 4, 2016, 10:46 am

i need hacker help to read some sms over ss7 can any one help my

johnripper - November 4, 2016, 11:51 am

Ss7 won't work any more
Government agency now have control over them

Last_viking - November 9, 2016, 6:24 am

(Nov 4, 2016 11:51 AM)johnripper Wrote: [\[CITE\]](#) Ss7 won't work any more

Government agency now have control over themseriously one of my friend is using it ? i mean ss7

imchatterbox - November 9, 2016, 11:23 pm

guys need help on this...im ready to pay if some one can help on this
skype socialhubmarketing

Last_viking - November 12, 2016, 12:47 am

Try this link gl.com and try set it by your self

ClaudeCMardis - November 15, 2016, 12:51 am

Hello, could I please have this since I cannot PM, I am a new member

youroozz - November 24, 2016, 4:26 pm

someone help me and ill pay!!!

Thanks bro , im thinking same things

Taaraz - November 26, 2016, 1:39 pm

Trust me this is not easy how it looks like on video.Not many can do this.And u need alot and alot stuff to be able something like this.

Even u need hack some old telecommunication station .This is not way to do hack fb easy and u will mostly 99 % fail.

d0kt0r1337 - May 20, 2017, 6:54 am
