Do you guys pop (or crack, whatever terminology you want to apply) your knuckles? How often?

test - September 27, 2016, 12:48 am

Maybe once a day. As far as I am aware it has no affect on your bones it's just gas being released from your joints.

?ane - September 27, 2016, 12:48 am

The second I read the title I popped them. I guess its a bad habit but I don't plan on living long enough to see the effects of it.

I guess I shouldn't have limited this to just knuckles, I pop/crack my back, neck, elbows etc...

Used to be able to snap my arm back in the good days. Can't anymore. It was fucking cool though. It would go "crack" loud as fuck.

AwrightA145 - September 27, 2016, 10:45 am

It is a terrible habit I have, I prob do it 10 times a day, wish I could stop!

Prophett - September 27, 2016, 10:46 am

Everyday. It's a habit but I don't believe there is anything bad of doing it.
