Are these Datacenter proxies? Any chance I could have a 1-3 hour test to see if they work for my purpose? Where are these based?

DWC. These are NOT private proxies as OP described and have horrible connection rates.
I was provided a test of 25 proxies and nearly all can be found on google.

For those that want to see for themselves here is the list:

I think you misunderstood.

I'm selling private list, as most providers will resell the same list all day. There is no need to get rude.

Can you guarantee the proxies not to be blacklisted? and to be alive?
