Thread: [CHEAP Custom Signatures. ~ Bloodstained](#)

?ane - September 27, 2016, 10:33 pm

Looking for a bad ass way to show off your favorite anime character/artist/actor/model/E-book/Online Alias? I have been doing this for a few years and I just started really getting into the hang of it again. Since it requires time I will charge \$3.00 BTC for each signature, below you will find the format for you to fill out for each signature. I try to get every detail you ask for your custom signature (If the request is complicated price may raise to \$5.00 BTC) and have it sent within 24 hours of the request.

I do ask that you don't bash my thread if you don't like my style. If you do, please fill out a request.

How it works;

- Fill out the request
- PM me with your post link
- I will respond when your piece is ready with BTC address info
- When I see the transaction, I will send you an imgur link along with the .psd file.
- If the signature is not satisfactory to you, you have 24 hours to request I fix or change it.

I do not go first

My work;

You are not allowed to sell outside the [marketplace](#). I bwlieve it results in a 3 days ban.

Amnesia420 - September 28, 2016, 8:20 am

Thats right. You will get a 3 days ban for posting it in the false section.
