Thread: [CryptoMessage.us | Destroyable Messages | Disposable Shoutbox | Encrypted Messaging](#)

Tommy Chong - September 28, 2016, 12:55 am

So I got bored and made this. I'm still learning so don't expect it to be perfect.
I'm still working on it and I'm planning to add more features.

Current features:

Destroyable messages

Message tracker

Disposable Shoutbox

All messages are stored encrypted in the database using Rijndael 256 encryption

32 byte Encryption keys are stored in a different database on a different host

IP logger with multiple domains and extensions

(Oct 5, 2016 04:20 AM)Steff™ Wrote: [\[CITE\]](#) Added a simple IP logger with the follow links to choose from:

<http://#.cf> (hint: brian krebs)

<http://exploit-db.cf>

<http://filedropper.cf>

[http://\[censored\].ga](http://[censored].ga) t i n y p i c (damn censore)

<http://googleusercontent.cf>

<http://slideshare.ml>

<http://theguardian.gq>

<http://theladbible.ga>

With the following extensions:

.jpg, .png, .gif, .php, .html, .mp3, .mp4, .exe, .rar, .zip, .webm
