Thread: [Trouble reading, reading software?](#)

andreasx22 - September 28, 2016, 1:06 pm

Not quite sure if this is the correct place to post it, but I've some trouble reading and my teacher gave me a huge text to read (PDF file) do anyone know a software that's able to read it out loud for me?

Convert it to a .doc file. Copy all the text. Throw it on any online text processor with dictation.

There are quite a few options for text-to-speech such as NaturalReader. I used similar for my SEN training, they sometimes mispronounce words but they can be quite useful.
