Thread: [FREE RAT Setup | help | METHODS](#)

Austinfrenzy - September 29, 2016, 2:36 pm

Ive been using rats and running several different rats for about 2 years now.

If you need help setting up a rat or have a question pm me your Skype or if you

cant pm just reply it to the thread and ill add you asap and try to get you

started; maybe even show you a few of my methods!

Feel free to add me if you want.

PLEASE HAVE TEAMVIEWER INSTALLED if possible!

I WILL NOT HELP WITH CRACKED RATS!Spoiler [\(Click to View\)](#) i get way to many people that try to come to me with cracked rats and it is disrespectful to the creators not to mention can be very unsafe as someone can just as well infect you with that cracked rat!

My skype is any other is not meSpoiler [\(Click to View\)](#)Code austinlacrosse

I dont suggest crypting files for new people, they'll most likely scan it on VT even if you tell them not to since the crypt will mean nothing to them since they got it for free, also use punctuation to make yourself look more professional, this wouldn't be my GO-TO choice for a RAT mentor, I'd rather choose someone with a more professional thread, also a more attractive title wouldn't hurt maybe like: RAT SETUP | FREE | STUFF YOU OFFER!.

Don't take this badly just fix it up then you might get some more people asking for help =)

GI, hope you help some people!

As I stated before, this guy is really helpful. This guy really did a lot for me and still in the process of teaching me the workings of RAT setup, I have never found someone as helpful as this guy on Hackforums, thank you so much man I really do appreciate you. I would say +7 but you defiantly deserve a +10, highly vouch for this guy.

Really amazing guy, helped me out a ton. Had a lot of issues that he helped me fix. Wouldn't have been able to setup my first RAT without him!

Thanks a bunch Austinfrenzy!!!

krashnopol - October 6, 2016, 6:46 am

i have messaged u in skype. plz respond.

I appreciate what Austin did for me today.

Was extremely fast in replying, was able to give me what I was looking for with no issues at all, and also gave me an extra helping hand in the process.

I would definately speak to Austin to ask questions and what not, but please do not freeload from him. Respect his time and effort going into things like these.

Thanks once again Austin, the experience was great.
