Thread: [Insert Image](#)

Juan The Young Chef Don - September 29, 2016, 3:00 pm

Ever since Imgur went all futuristic bullshit it's been not giving me the [img] shit. When I do the Insert Image when I'm making a thread I'll post it but it forgets the .jpg in the bb code. Someone should fix this please.

You need to copy the image url.

I have never had a problem with posting images from imgur. Just copy the url.
