Thread: [Private Crypting Service | FUD | Native | HQ](#)

Codefuser - September 29, 2016, 8:06 pm

I am offering a private crypting service.

The stub is coded in Autolt and is native.

Price is negotiable. Don't lowball me.

Stub size is around 500kb (Very small for Autolt)

FUD time is forever (if stub is not distributed, have been tested)

Scan:

[img]http://NoDistribute.com/result/image/652w781zZVnjOJXtf.png[/img]

The crypt is runtime UD with both .NET and native files (anti mem scan implemented)

PM me if you are interested.

Please note that Private Crypts' long FUD time are only under the condition that it is not distributed

Additional features such as persistence, etc available.

ThomasGB - September 29, 2016, 8:08 pm

What's your price ? and what about private stubs !

Codefuser - September 29, 2016, 8:09 pm

loadpe is best

GLWS bro

Nah currently only doing RunPE + anti mem scan

LoadPE is reserved for Sonya Crypter

It is runtime UD still though (which is as good as it gets here until LoadPE comes into play)
