I am giving away a secret [BRAND NAME REMOVED] marketing strategy that many people probably have no idea is possible.

I personally use this to advertise events and parties but I am sure if you are creative you can use this for anything like promoting your instagram or the easiest of them all, ewhoring!

Let me know if you would like this :)

Please keep it a secret!

This is the most basic bluestacks method... if you didn't know this works then you don't use [BRAND NAME REMOVED] and see all the bots spamming... cmon now.
