Thread: [Cerber Ransom](#)

mrfong - October 1, 2016, 12:28 am

Hey guys so a friend of mine has a huge store which is worth alot of money and someone hacked the store's pc and decrypted a file that has alot of important info that is worth alot of money aswell so how can i decrypt the file, is there any way? here is a picture:

mrfong - October 1, 2016, 12:37 am

:(that file contains alot of unpaid transctions that are worth over 250k USD and i needed it decrypted,i don't want the ransomware removed just decrypting this file will be enough

I am assuming he didn't do any back ups?

mrfong - October 1, 2016, 1:10 am

yeah he doesn't have any backups..

Aura - October 1, 2016, 5:30 am

Whats the extension that was appended to the encrypted files?

Then he has to pay for his stupidity.

You said the DB worths more than 250K right? then I guess that 1K / 2K \$ is nothing for him.

mrfong - October 2, 2016, 3:42 am

It is nothing at all, but is it 100% that the files will be unlocked?

JoshuTee - October 2, 2016, 4:51 am

I'm afraid no, you need to trust the criminal you're paying \$1k to. It's possible that he'll just take the cash and insult you, but in most cases you do get the decryptor, which works.

Uh, the image has a link to decrypt 1 file free...?

Have you tried that?

Katarina Du Couteau - October 2, 2016, 7:03 am

Didnt Cerberus just givr out its Master Key???

Google it, i think they did...
