Thread: [How do you reset malwarebytes free trial?](#)

Account of the Gods - October 1, 2016, 4:03 am

Malwarebytes is quite amazing stuff, I don't know if its best, but its sure good. However its even more expensive than its good and therefore i can't afford it. Long time ago people were using CCleaner and were changing system date to reset the antivirus free trial. But that doesnt work anymore. Do you guys know actual ways to reset the trial version without actually formatting the whole system? damn

Sc0rpian - October 1, 2016, 4:16 am

May be you can check below site to get the serial keys of that tool where you will get the full version of the malwarebytes software.

unfortunately ive checked all of themm and they are not working
thanks tho

Dotexe - October 1, 2016, 4:23 am

As far as i know recently my friend just deleted CCleaner he warned me that this tool deleting win files not sure if thats a correct tho, but just to inform ya if you want to be sure check google !

Just buy the product if you like it. Don't be an asshole.

this is pretty white hat behavior, so i see 2 sides win here

They can clearly run on donations or something.

Their team puts in a shit ton of work to keep their users as protected as possible.
They're a legal organisation and if they ran off profits, their team wouldn't be awarded for their work enough.

Arguments clearly made by 12 years old. Once you become adults, you're in for a reality check. Brace yourselves.

You're just hiding yourself behind that argument. White Hats operates within the confine of the law and with authorisation. It is against Malwarebytes EULA to use to pirate their product, so there's nothing White Hat there. Like I said, you are clearly too young to understand what you're saying/asking here, but maybe one day when you grow older you will.
