Thread: [Decided to hop on a VPN](#)

DarkButBright - October 1, 2016, 1:48 pm

I want to buy a Vpn sub and be on a vpn is there a vpn that i can use that will still allow me to use HF?I dont want to be looked as like a multi if the vpns come off various ips and stuff.

Can I surf hf with a vpn?

Whats the best hf vpn your using(cheap) ?

????Kosdff - October 1, 2016, 1:52 pm

CrypticVPN works fine, just add Hackforums.net into the Route setting :)

ra1d - October 1, 2016, 1:55 pm

Most VPN providers are blocked from accessing HF.

However you can choose to use a VPN, and route your connection for HF specifically.

You can do it manually via CMD or use this tool

<https://github.com/ThatMadGuy/Route-Manager/releases>

What does 'Adding to route' do?

Routes your connection to HF through your own internet connection instead of the VPN connection.

SanctualProductions - October 1, 2016, 2:10 pm

How would I do this on a Debian OS?

```
Code @echo off  
cls
```

:START

```
route add 104.23.132.82 192.168.0.1
```

```
route add 104.23.128.83 192.168.0.1
```

```
goto START
```

Batch file, will add HF to your routing, just drop it in your startup, and you'll never have to worry about it, unless CF changes HF's IPs.

You can remove the :START and goto START

I was just having issues without it there.

Replace 192.168.0.1 with your gateway....

Honestly, I did not even know there was a workaround to that problem. You have my sincerest thanks!

Route Add IP GATEWAY

Lets any connections from that specific IP flow directly to your gateway,

So if you on a VPN, for example, any requests to or from that IP you set, will ignore the VPN, and get your real IP anyways.

Useful for sites that block VPN access.

No worries man!

Enjoy being able to stay on your VPN.

Should also mention, I believe that command has to be run in a prompt with elevated access, so run CMD as Admin...

That tool looks nice, Thanks for sharing it man!

forfor2020 - October 1, 2016, 3:15 pm

ya there are many vpns that actually work for hf....but it won't affect you if you're still logged in cause of your cookies saving your info so even at a new IP/location it really won't show as a new log

in....but your post do show a different ip but it'll be obvs that it's a vpn for a staff/omni but regardless I rarely have seen kids get banned over using vpns or being mistaken as a multi very rare

It's not that the VPN's don't work for HF, but HF blocks the VPNs...

They have a system for determining if your IP is from a VPN or not.

ZuGgY - October 1, 2016, 3:55 pm

IIRC/from what I last remember, HF doesn't disallow VPN's altogether, however most of the common ones have been blocked in order to help fight against ban evasions, etc.

We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.

4101 - October 2, 2016, 12:17 am

Easiest way use a socks5 through firefox browser

Roger Waters - October 2, 2016, 8:51 am

There are no promises that any VPN will work other than one that is routed through your home connection.

If you use a VPN that another member is using and either one of you breaks site policy, you'll both be at risk for getting banned or possible closure.
