Thread: [Shopify Assistance - Need you to complete my setup! \[PAYING IN BTC\]](#)

Battlefield4Pro - October 2, 2016, 3:41 pm

Hey guys, so I need someone either currently with a good shopify page running themselves or have done this sort of thing before. Pretty much I have my shopify shop already made ex. just doing some editing to it along with finishing touches.

What I need you to do:

- Evaluate my site and make it look amazing spruce it up in any way to appeal to everybody
- Setup the actual payments and everything of the shop to make sure it's fully up and running (so like help me setup all the payment methods along with anything else needed to make sure the shop is up and running successfully)
- Tell me the best places to advertise my brand where it would get the most possible views/interests/conversions (I will buy ads ex. just let me know the best methods)

What I offer:

- For your assistance I offer compensation in BTC but the rate is depending on the work done. (Generally from little work I can do 10\$BTC but for a real big help and setup like to make sure my site is up and ready to go can even do 30-40\$BTC!)

Again it's not much work required the site is pretty much done professionally just spruce it up a bit and help with the actual setup of the site to make it launch without issues ex. For those who either have or currently operate a shopify page you know what I mean just help me get it up and running.

If you can do this PM me your Skype!
