Hello world!

Convert your old Android phone into a Spy Phone! Works with sms commands!

Just hide your phone somewhere, plug it into a USB Charger if you want to use it for long periods.

You can also hide it somewhere without a Charger but the phone will drain the battery, because when the app is open the phone will Stay awake/Standby.

So hiding it without charger will only work for as long as your battery works.

The commands.

sms "Call me" and the Phone will call you. (You can listen to what is happening at home for example.)

sms "Record" to start recording sound.

sms "Stop" to stop recording.

sms "Shutdown" and the app will close.

Google Play removed this app because it violates their terms, so you can get it here: [Buy HERE for 5 Dollar in BTC!](#) You can also pay in ethereum, doge, litecoin, monero, dash and bitcoin cash.

You can also make some money yourself by selling my app!

Yes it runs on both, new and old devices. I use it on a samsung galaxy ace, a old one. But a girlfriend of mine uses it on a new samsung galaxy s6. That's why i kept it simple.. so it runs on most androids.

This is a really cool looking app.. It's too bad Google removed it..

Why did they remove it?

Because it is against their policy. You can spy on people and they don't want that.

I love that your screenshot appears to be on an iPhone. (Yes, I can see that it's photoshopped) All jokes aside, it looks like a cool concept, but I can do the same thing with Cerberus, and that's still on the Play Store.

(NO not photoshopped at all), the screenshot is from <https://appetize.io> a online emulator and its on a nexus 5, But yes it is on a Iphone i guess on the Picture. Could not find another phone with a hand with transparant background. Thats nice for Cerberus, but its totally different and needs a rooted phone, Anyways... you want a screenshot of the mail i got from google? No liar here.... im realer then real, and a honest person. The source code is available to if you want to buy it. I will send you a video of my app to show its real.

Thanks, Yes and it will keep working to. It does not require a rooted phone. Easy to install like any other normal app. It works on most old androids to. It's not using anything special other then call and sms functions.

Sounds like a good app not as complicated as most android spy software. Please send me a couch copy. what will the currency(dollar/pound) value be for selling? Thanx

Korvo - *February 14, 2017, 1:26 pm*
Pretty sure this should be in the marketplace.

However it does look like an interesting app, I personally just use my old devices as an IP camera and does pretty much the same thing, minus the commands. Anyways, good luck with this.
