Thread: [Advanced VPN Client // 1 COPY ONLY // Many Features // TCP/UDP](#)

Netw?rk - October 3, 2016, 1:18 pm

I am selling my most recent project N-VPN.

I was about to start my own VPN service but stopped because I have no time to do so.

N stands for Network before you ask.

[Features]

Graphic statistics of bytes Received/Sent.

Customs Controls (Fully customizable (Colors/Fonts ect).

Check server status (Online/Offline).

TCP/UDP connections.

Custom Speed Test (Download/Upload).

TAP Driver Installer.

Disable internet connections if the client isn't connected to any Server (Optional).

Reconnects if the connection with the client is lost (Optional).

Check origin country and IP (e.g: If you connect to United States server it will search for the IP and Country and display the country on a PictureBox and the IP on a label).

Logs (Check all the events on the Client).

Automatically checks for updates.

Open webpage when connected showing your IP and Country (Optional).

Backend application (Edit server status (Online/Offline) and Speedtest file to be downloaded/uploaded (Default is an 500MB file)).

Many more.

[Includes]

Full project VB & C#.

Images (Logo, Icons ect)(PSD, Ico, Png, Vector).

My full support 24/7 (TeamViewer or/and Skype Call).

[Screenshots]

Spoiler [\(Click to View\)](#)

Connecting:

Speedtest (Download) Finished:

Speedtest (Download) Testing:

[Price]
\$300 BTC

For all potential buyers:
I will add L2TP & PPTP later day upon your request for free.
I'll also re-brand/change colors/logo for free.

Want to start your own VPN company but don't know how?
Take a look at [Cryptic™](#)'s service [here](#).

Faceless Man - October 3, 2016, 1:37 pm

Vouch for my boy Network, don't hesitate to buy from this guy

maxdublob - October 3, 2016, 1:58 pm

Vouch for Network, this guy is awesome!

Mi2414 - October 3, 2016, 7:53 pm

Client looks sick, vouch for my boy Network!

Cryptic™ - October 3, 2016, 9:55 pm

Would this happen to be based on the CloudVPN source?

Netw?rk - October 3, 2016, 10:00 pm

(Oct 3, 2016 09:55 PM)Cryptic™ Wrote: [\[CITE\]](#) Would this happen to be based on the CloudVPN source?

No at all, first this is 10 times more stable than those free vpn clients out there (Like the one 143 VPN is using) and secondly this have way more original features.

Completely coded from scratch (C# and VB version).

It's not free, but anyone can purchase a commercial license.

How customizable is this and what are the requirements for port forwarding to integrate with a web

based control panel? (Not a coder)

Don't know to be honest, just saw a bunch of VPN providers here on HF using the same source so I thought it was a free one.

(Oct 4, 2016 06:09 PM)Eternal. Wrote: [\[CITE\]](#) How customizable is this and what are the requirements for port forwarding to integrate with a web based control panel? (Not a coder)

It's fully customizable, literally. (E.g: Instead of a dark look you can change it to a lighter look, from TabControl to buttons, graph, textboxes, form ect).

We can work something out, in your case the user login into their 143 account and by that we can access the Port Forwarding page to proceed to the Port forwarding.

If you have any other question feel free to ask.

?OPTIC - October 5, 2016, 1:05 am

This VPN Client looks very nice. Good luck with sales.
