Honestly I despise people like you who hate the normals. Just because you have a userbar and he doesn't gives you to right to be condescending and demeaning to the normals which make up 99% of HF. No way. Anyone can be high quality including normals. You need to respect them.

Doesn't really sound convincing coming from a UB3R who has 60% warning.

You missed my whole point. Just because one has a userbar doesn't give them any right to be condescending to a normal. A normal can be just as High Quality as anyone else, including ub3rs and l33ts.

True true, however it's really sad that others won't see it like that.

1 v 1 me right now? Just because I'm ub3r doesn't mean I start off at an advantage. We start off at an even level.
