Received the vouch copy from OP. Here is my unbiased review for the ebook.

- 1) In my opinion the ebook is well written and its simple in appearance.
- 2) Process is well explained with some pre-answered FAQ's.
- 3) OP has explained how exactly you make profit by the method mentioned in e-book.
- 4) OP has also included some pictures in the ebook to explain the profit making process.
- 5) OP has also explained the mathematical formula to ascertain the profit making scenario.

Final verdict: Unlike every other e-book review, I am not going to judge the worth of this e-book. All I can state here in all honesty is that I enjoyed reading the e-book. Buying this e-book or not should be totally your call, without the help of my unbiased review. I am posting it voluntarily just coz I like to support people who actually sell some meaningful product unlike people who like selling crap put together into a pdf.

Last vouch copy? I trade a lot of BTC between PayPal and BTC and if this is a working method with no issues I will still pay you partial of \$20 and review? Let me know if that sounds fair. Thanks.

This is an excellent method to turn your paypal to bitcoin.

A method that I will be using too.

I can't say how it is done, but it is an intelligent way.

I know that Devil Killer experimented a lot to find that method.

The result is satisfying.

Feeling the confidence that you can exchange your paypal to bitcoin without running the risk to get scammed is a huge stress relief.

A great money saving method. Thank you, Devil Killer.

Steam is the requirement and no verification required. And cant say why its not instant.

And no limit per transaction just time .

Is there a possibility of AGC --> BTC directly? Or always has to be AGC --> PP --> BTC?

And a 100% conversion every time? Also, when you say small amounts of AGC, what's the ceiling exactly? \$100 can be small, so can \$1000.

Edit:

Does this work with an unverified PP? Any risks of getting limited?
