Thread: [FREE Instagram Tool \(Uploader, Liker, Scraper +more\)](#)

luke90 - October 4, 2016, 9:05 am

Hello ?,

I am Like, a new member of this forum. As of my first post, I want to share with you a tool I've build for Instagram.

I called it, IGTool. It is an early version, probably a lot of bugs still needs to be fixed but we can do it together.

Main Features:

- Uploading Pictures
- Like Pictures
- Post Comments
- Follow users from search results, user followers, from a list
- Unfollow non-followers
- Send a direct text/image to followers/followings
- Scrape pictures, avatars, usernames
- Change accounts password
- Upload avatars

- proxy support
- socket based (very fast)
- documentation attached

+ more

Installing:

Download the .rar file, extract it on to your computer and run the tool. On the first run it will ask you to fill a form with your Name and Email. This will generate a unique license. You can fill it whatever you want and restart the tool. Now you should be good to go.

Documentation:

The documentation come attached to the tool. It might be a bit confusing at the first but it should be enough to get you starting.

Download:

Code [www . mediafire.com/file/hyqe10h6kpdh2q1/IGTool.rar](http://www.mediafire.com/file/hyqe10h6kpdh2q1/IGTool.rar)
VirusTotal:

Detection ratio: 0 / 56

Code www .

virustotal.com/en/file/5e982e17345ddf99764fecb96bdf365c49cdf90d7005c5411be63d9bbd5b9ea/analysis/1475595253/

Requirements:

- Windows based machine only
- .NET Framework 3.5

I am a new memeber and unfortunately I can't post links yet. I will update the thread when I will be able to.

I will try to assist with any issues. If any bugs come up, please let me know. We can try fixing them.

Cheers,
Luke.

Be careful guys!

Toby Flenderson - *October 4, 2016, 9:09 am*

If somebody could run a virus scan that would be greeeeaaaat

cause almost got ratted once with something exactly like this lol

patriotaki - *October 4, 2016, 9:52 am*

good job mate

can it post comment in specific users? on latest post?
same for likes?

instead of putting ID's can we put usernames?

luke90 - *October 4, 2016, 10:25 am*

There is a function to comment every time a specific user make a new post.

There is a function to comment every time a specific user make a new post.

If you could add the functionality of reading the usernames from a txt file and go like & comment (with spintax) the most recent picture of each user that would be mindblowing!

If you are interested implenting these functions let me know please.

for example load a txt file : list.txt
which contains:
@username1
@username2
...

you get my point

I understand. That is something we can implement.

Tax - October 5, 2016, 1:21 pm

Can someone run a virus scan on this? :D

Lansanity - October 5, 2016, 4:35 pm

seems fishy tbh. someone run a virus scan pls.

luke90 - October 6, 2016, 6:29 am

(Oct 6, 2016 03:40 AM)SpongeHacker Wrote: [\[CITE\]](#) Here you go

virustotal.com/el/file/5e982e17345ddf99764feccb96bdf365c49cdf90d7005c5411be63d9bbd5b9ea/analysis/1475750143/

but the thing that this dude has two accounts seems suspicious, maybe it could be FUD. Also his account is only 2 days old.

Thank you for posting this. I had a different account on this forum that I was using strictly to login and read the news in the social networking section. However, I didn't want to join the discussion with that account due to it's really childish username and for the fact that it was connected to my main email address. That's why I decided to create a new account and use this instead.

patriotaki - October 6, 2016, 6:03 pm

if you implement the features i told you earlier could i get a copy and test it out? because im in many groups with over 700members each that does this thing

luke90 - October 6, 2016, 9:07 pm

if you implement it it would be awesome mate really! its very helpful trust me

AeroDrag - November 1, 2016, 9:19 am

I would be extremely careful. Seems quite sketchy.

soguksuu - May 15, 2020, 3:58 pm

Hi . it wants key and mail. you say its free
