is it only for managed files?

Nick (Name) - October 5, 2016, 1:02 pm

Sweet, glad to see that you're post more about this project on HF. I can definitely vouch for his work, I've seen some things man. He's shown me various modules and outputs from his project, definely a HQ project! ?

Bane - October 6, 2016, 8:50 am

Sleek did a crypt for me, had some errors at first, he was straight on it, fixing them and giving me support throughout it.

Very professional, definitely a HQ user.
Good luck on this project in the future buddy.
