Thread: [Help redirects not ssl](#)

Mr. RandQm_TEMP - October 5, 2016, 3:59 pm

Not sure if this still had to be updated or not, or if they're supposed to be ssl.
But the redirects @ <https://hackforums.net/misc.php?action=help&hid=27>
Are not secure links,
e.g. show staff goes to: <http://hackforums.net/showstaff.php>

minimalist - October 5, 2016, 4:02 pm

that's because you're going to those links from an <http://> link (which hf still serves), just add an <https://> to your starting url and all other urls will become <https://> urls

Mr. RandQm_TEMP - October 5, 2016, 4:23 pm

Nope I used; <https://hackforums.net/misc.php?action=help&hid=27>

thales - October 5, 2016, 4:24 pm

staff redirected me to [https](https://)

Omniscient - October 5, 2016, 4:58 pm

A lot of links in the [Help Docs](#) are static. I'll go make the edits.

EDIT: Fixed.
