Thread: [500 Usd build for friend](#)

lamgod322 - October 6, 2016, 2:51 pm

Hello, my friend wants to build a pc instead of buying one because I told him how stupid it would be to just go and buy a prebuilt one. I've been out of the hardware game for a bit and am not sure what a solid 500\$ gaming build would be could anyone help?
