Your thread design doesn't display well when viewing on mobile buddy. The two halves wrap underneath.

Anyway, looks great, GLWS.

kaserighi576j - October 16, 2016, 3:55 am

Hi. Just purchased. Could you PM me an explanation of how I can get started with this. Thanks

Rocky2u - October 17, 2016, 12:59 am

Here's my current review of the product:

First of all, I just want to say that I've bought the \$25 one, with unlimited support.

The only things I've tested were Instagram and Twitter, I'm not sure if the others work.

The Instagram part of FlexHacker doesn't even work.

I've contacted Ayden about fixing it and he said he'll fix it soon, but it's been almost week already and it still hasn't been fixed.

I've then asked him for a refund because of the product not working fully, told me he would in 48

hours or less if he didn't get it working, still haven't gotten my money back.

I know that the TOS says otherwise about refunds, but I mainly bought this for Instagram!

He was nice at first, helping me with certain things, then he just started to ignore me or he would reply days later.

TL;DR

I don't recommend buying this and from what I've tested, the Instagram module doesn't work.

1. Instagram module is getting an update pushed when my developer comes back from holidays (1 week).

2. You then asked for ebooks for exchange of a refund?

3. Then you changed your mine back to a refund?

Please make up your mind. I only read that you wanted a refund (again) today.
