Thread: [\[Free \] UACnty - An UAC Bypass Stub Builder](#)

?anti.team? - October 7, 2016, 3:15 pm

Windows might or might not have it fixed

UACnty

Hello people! After long inactivity I've thought I could post my latest project. (Literally finished 5 minutes ago)

This is a stub builder for an UAC Bypass I have found.

Basically it let's you run anything as administrator. (Unconfirmed if it works on school pcs)

Screenshot

FeaturesOptional Assembly Info editing

Include local file

[OR]

Download file

Safe Stub Generation (namespaces and variable names differ all the time => less likely to get detected)

Optionally add icon

Protection against dumping and debugging

Optional functionality to freeze processes such as taskmgr while running

Save and Load Projects

Using a custom Malware Framework

Stub Size (with Downloading) is usually about 64 kb (Framework included inside the application)

UAC Access granted without questioning (Except Firewall level is on highest)

Likely UD4lyf

Confirmed to run and work on:

Win 7, Win 8, Win 8.1, Win 10

DETECTIONS OF STUB 7th of October 2016:

5/56 although all of those anti viruses are saying different stuff
and they are not being used -> actually false positives
(Baidu, CrowdStrike Falcon, Invincea, Qihoo-360, Symantec)

PM me for download

I've been testing them myself, it works very well, my guess is that your slave panicked as the
program suddenly opened.

avs16145 - October 13, 2016, 2:31 am

can you give me ? I don't scan it
